

## 2023 Year 8 JCU Uni X Excursion feedback Group 2

### **Jake Caldwell**

At the university today, I learnt about various degrees and majors that I could possibly study. My favourite part of the day was the nice thoughtful staff at the university. My two favourite subjects were Law, because I like speaking in front of crowds. My other favourite subject was engineering because it was interesting and fun. Overall, I enjoyed my day at JCU and would highly recommend.

### **Matthew Rowbotham**

Today was an overall good day with me finding Law boring as well as Education useless. My favourite was engineering as I was good at it and seriously consider as a job pursuit.

### **Joey Little**

I enjoyed my day at JCU as I became engaged in many different activities such as, Law, Business, Education, Social Sciences and Engineering. I found each activity engaging as each one presented its own challenges. I believe JCU is an effective place to learn.

### **Rainer Field**

Aussie was good fun and bye.

### **Joel Paridean**

I was very fascinating. I liked the subjects and the hands-on activities. Our dude Ozzy was a very cool person and made it even more fun.

### **William Handley**

JCU is a world class university with everything a student ever needs, even a café and the teachers are really positive.

### **Nate Brookes**

Today at JCU I learnt how many degrees there really are and how modern the campus is.

**Dylan Cahill**

It was very fascinating. I liked Ozzie he was funny and chill. The activities were weird but the lunch was a smash.

**Luke Cerutti**

I liked the activities and how interactive they were. I liked all the activities that we did and I'm sure my fellow classmates did too. All the tour guides were very nice and helped us to feel more confident and less afraid of going to university. Thank you for all your effort and your time. I enjoyed myself very much and look forward to learning more.

**Mitchell Scarcella**

I enjoyed the positive attitude throughout the day at all the stations/activities. I really enjoyed the team's positive attitude and how we all came together to produce our final product. I found it helpful by how we participated in hands on and practical activities. The staff at the university were very helpful and ready to help if it was needed. The overall day was positive and an amazing opportunity for the Saints College.

**Archie Clifton**

Today's visit to the university was very helpful for me as it helped me to understand what uni is like. All the staff at JCU were so very helpful and I am thankful for what they helped me with. My favourite activity by far was engineering as I loved having to think about where the sticks go and it also helped me think outside the box.

**Darcy Brien**

It was fun learning some of the possible career paths close to home. Also hanging out with the amazing teachers and students who aided me during the day.

**Michael Bani**

JCU was the best and the food was the best, but I will never go to university because there is a lot of opportunity.

**Aston Edwards**

I wish there was more food. It was kind of helpful in showing opportunities at uni but I don't think I want to spend another 4 years at school.

### **Gus Quilty**

Today at JCU I learnt about different options and opportunities university can offer. I never really thought about some jobs and options, but they have helped me to open up some options and subjects I may enjoy. I really liked this excursion.

### **Harrison Law**

Today's activity has been a great experience for me and my fellow classmates. We learnt about subjects we had never learned before such as Law, Engineering and Business. I am very appreciative for the option to visit one of the best universities in Far North Australia. Thank you for having me.

### **Anonymous**

It helped me understand what the JCU campus is like and what they can offer if I were to go there.

Today at JCU I found the facility really cool but it didn't have a basketball court, so I wasn't very interested. Also, because I would rather go D1 College.

We had Subway for lunch which was good, and we had Uncle Toby's. We got to see the inside of all of the buildings and how chill uni life is. I also Michael in shadow boxing.

I liked how the university involved us in all at the activities and how they make the lesson entertaining.

We had Subway for lunch, and we also had Uncle Toby's. We got to see the inside of the university. I also clipped Gus in shadow boxing (he is bad).

I enjoyed the JCU excursion because I really loved the "moot case/court case." It was very exciting deciding whether to split or leave jail punishments. Furthermore, the tour guide who I had was very nice and helpful throughout the experience. Lastly, the bridge building in engineering was a blast of a time putting a Da Vinci bridge into action. Sadly, missed out on Crankworx.

At my time at JCU it was very enjoyable. The people we had were very nice and the activities were fun. Ozzy was the best.

Today I learnt about my future career opportunities and paths which I can take in my life. I liked the business activity the most as it showed a lot of different career options with just one degree. The JCU attendants were nice and informative which for me are role models.

I enjoyed the parts with public speaking. Those were fun and had creativity. The ambassadors were really good, and our tour guide was amazing. Definitely going there in the future.

The JCU visit was helpful in some ways.

I enjoyed my time at JCU a lot and the people were extremely nice. The ambassadors were amazing and they were inspiring. Definitely coming back in the future.

I immensely enjoyed my time at JCU, the staff were kind and supportive while taking us around the campus. The visit showed me that I can go to university and study my interests while having fun doing so. I am grateful for the visit and can't wait for when I'll have the chance to go there again.

Today I learnt about my future carer options and paths which I can take in my life. I enjoyed the Earth 2.0 activity as you could make your own school which was interesting seeing my ideas.

After spending a day at JCU and learning about what it offers, I have discovered things which I like and dislike. The mechanical side of the uni very interesting.

What I like about JCU was that it made one proactive teamwork and logical thinking with amazing mentors.

Today at JCU business and engineering were the best out of all the subjects. I loved how we got to learn about budgeting money on buying things and I also loved making one of Leonardo Di Vinci's bridges.

I found Law interesting at JCU as it was easy and I enjoyed it. I also would like to own a business in the future.

Today at JCU, I found Business and Law the most interesting. We got to take control of the defendant and defend for Goldilocks. In business we got to create our own Jurassic Island. The people leading the classes and taking us to classes were good as well.

It was a great learning experience for me and just a fun day in general. The food was good and the staff and students were kind.

JCU was fun and informative in many ways. I got to learn about how university worked and what life is like being there. There were lots of activities to take part in and they were fun.

I enjoyed the activities we did today as we were taught by really friendly people. The campus was very modern and the seats in the Engineering class were really comfortable. Social studies involved doing an activity that made us do a social experiment.

I enjoyed all the activities. The Law acting was fun and funny. JCU has a great campus. The Business was very fun as well. All round was a great day.

The Ambassador Aussie was very helpful and nice so were the teachers.

I was alright.

JCU was very helpful in helping us understand the very large opportunities that school can give us. It also helps us understand what type of career we want to have.

JCU was helpful in informing me about careers and education choices. The ambassadors were very nice and friendly. I learnt more about jobs and career paths while on the trip. I had a great time and it was a good experience.

It was amazing to be on the campus. The teachers were mad and the food was good too.

Today at JCU I learnt lots of things. I learnt about career choices. My favourite activity was the law court activity. My least favourite activity was the Earth 2.0 activity. I didn't think it was good.

I like the Law activity and I enjoyed the day exploring different opportunities at the uni.

Today was good overall. Law and Education weren't super interesting or fun. I found Social Studies interesting, and Engineering was both fun and interesting. The ambassadors were great fun and very nice and kind. Finally, Business was alright.

JCU is very big and has lots of things to do. I found out in Uni you can skip class and not get in trouble.
