

A Day in the Life of an ECU Science Student

You can study many kinds of science at ECU, but how do you narrow down what you'd like to study?

This one day event will give you an insight into what it's like to study science at uni, starting with a lecture in your area of interest and a tour of our facilities. You'll get a break for lunch and a chance to explore campus (and our many cafes), followed by an interactive workshop. Finish the day with a Q&A session about entry pathways, student life, and study options.

This event is for those thinking about coming to uni soon, including mature age students, TAFE students and high school leavers.

You can choose from the following areas when you select a ticket: Horticulture, Environmental Sciences, Computer Science, Data Science & Maths, Cyber Security, and Marine & Freshwater Science.
