

"It Won't Happen to Me'..... Until It Does!"

P.A.R.T.Y. On Program

As healthcare workers, we see firsthand the devastating impact of risk-taking behaviours on young lives.

We care for the consequences every day — serious injury, lifelong disability, and loss — and we know that many young people believe *"it won't happen to me."*

With this in mind, the team from **The Alfred's P.A.R.T.Y. Program** (*Prevent Alcohol and Risk-Related Trauma in Youth*) warmly invites you to attend our upcoming **after-hours P.A.R.T.Y. On program**, and to bring along the young people in your life aged **16–25 years** — your children, family members, or close friends.

EVENT DETAILS:

 **Date:** Tuesday 1st September 2026

 **Time:** 5:30pm – 8:00pm (2.5 hours)

 **Location:** Alfred Innovation & Education Hub
75 Commercial Road, Melbourne 3004

This powerful and confronting evening session is designed for **older youth, their families, and friends.**

Participants will gain a **real-world, honest insight** into the true consequences of risky behaviour — delivered by the very **clinicians and first responders** who witness these outcomes daily.

WHAT TO EXPECT

Thanks to the generous philanthropic support of the **Highland Foundation**, the program includes:

- Powerful video content and live demonstrations
- Presentations from Alfred Health clinicians, first responders, and allied health professionals
- A compelling first-hand account from a former trauma patient

The **P.A.R.T.Y. Program** team don't lecture; they use proactive education, real-life scenarios, and interactive experiences to reinforce:

- Safe and responsible decision-making
- Injury prevention
- The realities of impaired driving and substance use

Our goal: to empower young Victorians to make informed choices and avoid life-changing or life-threatening outcomes.

 **Clinical Area Visits:** Visit's to trauma clinical areas (*Trauma Centre & Intensive Care Unit*) **may be included**, subject to patient activity and workload on the night.

COST & REGISTRATION:

 **\$30.00 per person.**

To purchase tickets or to learn more about the program click on the link or QR code

<https://buytickets.at/alfredhealth/2311270>

Cancellation Policy: Cancellations received more than **48 hours** before the event are eligible for a refund. Refunds cannot be provided for no-shows.

 **Light refreshments will be provided. Please inform us if you have any dietary requirements.**

Feedback from past programs:

- *"It's so hard to pick. It was all was perfectly put together with each speaker bringing a different perspective to the same message. Having Helen (I think that was her name) as the first speaker was amazing. She just hooked you in making me want to hear more. I also found the detectives information very interesting especially hearing about what drugs contain. I took a photo of the slide and have already sent to several people. And I must say walking thru icu, ER and the helipad was amazing. It makes everything from program real and amazing"*
- *"My three teenagers (19, 19 & 17) were totally engaged by every speaker, slide and hospital walk through. I couldn't give them this very real education. Eg, Appreciated Helen's way of speaking to the core, no BS approach & Paul's drug talk. CPR demo was great. Just everything! I personally thank you and respect you for everything you took the time to present and for putting it into practice every single day."*
- *"All of it was amazing. The doctor came out with a bang and it just continued on from there. The policeman was really cool and the things he talked about really made me think. The drug slides were really scary. The ambulance officer was funny and taught me that I don't need to give breaths when doing CPR and that I won't get into trouble if I've done something wrong and need the police. Seeing Oska made me realise that it can happen to me so to think about the consequences. They can last a lifetime and hurt everyone around me"*
