

Term 2 Performing Arts Curriculum Overview 2024

Elements of Dance

Last year the students looked at Dance and its relationship to community, culture and celebration. This term we will take a more analytical approach to dance. The students will investigate the elements of Dance. We will look at six dance styles that the children will learn, each of the dance styles will illustrate one of the six dance elements.

At the end of the unit, the junior students will be able to perform the dances in addition to naming each of the elements of the individual dances. The senior students will use their understanding of the dances and their elements to choreograph a short dance performance.

I look forward to working with all the students this term.
