

What I Wish Every Parent Knew

Online Safety Edition

Overview:

Most parents think online safety means blocking apps and setting screen limits. It doesn't. In this keynote, Kristi dismantles the myths about "supervised" screen time and exposes how predators, peers, and algorithms collide to create real-world harm. With the insight of a former detective and child abuse investigator, Kristi translates complex online risks - gaming, social media, sextortion, and digital grooming - into language every parent can understand and act on. This isn't about fear, it's about preparation. Kristi gives parents the clarity, tools, and confidence to protect their kids online before something happens. The talk that every digital-age parent needs to hear - honest, empowering, and impossible to ignore.

Key Takeaways:

- How online grooming really happens and how parents miss the signs
- The digital red flags every adult must recognise
- Scripts and tools for calm, confident online safety conversations
- How to create safer digital boundaries without killing connection
- Turning fear into informed, empowered parenting

Delivery Format:

- 60-minute webinar or keynote presentation
- 15-minute Q&A or interactive discussion

Ideal Audiences:

- School parent nights and cyber safety events
- Community and parenting conferences
- Early learning and primary parent groups
- Youth wellbeing and online education programs

"Kristi delivered an exceptional presentation on online safety for our parents. She thoroughly explained the risks children face online, using real examples that were eye-opening. Kristi provided practical solutions, such as setting up parental control apps, to help protect kids in the digital world. Her personal stories resonated deeply with attendees, making her message even more impactful. Thank you, Kristi, for your invaluable insights on Online Safety Awareness."
Ptreece Griffiths, St Francis of Assisi Primary Education
