

## COVID-19 RAPID TEST CONCESSIONAL ACCESS (CRTCA) PROGRAM – FREQUENTLY ASKED QUESTIONS FOR PATIENTS

**Stay COVIDsafe** - If you have symptoms of COVID-19, **don't** go to a pharmacy to collect a rapid antigen test. Instead, check your state or territory health authority's [directions](#) on what to do. In most cases, this will mean you should go straight to a COVID-19 testing centre.

**CRTCA FAQs**

- 2.8** How often can I get the RATs? I just got 5 tests today, when can I get the next lot of 5? ..... 5
- 2.9** I've waited until April to pick up any free RAT tests. As the program is continuing until 30 April can I pick up all 10 in April? ..... 5
- 2.10** I had a valid concession card and picked up some of my free RAT allocation but my concession is now no longer valid. Can I still collect the remaining tests for the month/three-month period?..... 5
- 2.11** I have lost my supplies and really need them. Can I get more? ..... 5
- 2.12** Are all pharmacies participating in this program? If not, how do I find out where to get these RATS?..... 6
- 2.13** I'm currently overseas but my concession card is still valid. Can someone pick it up on my behalf and mail it to me? ..... 6
- 2.14** I went to all the pharmacies in my suburb and there is no stock available. How do I obtain any?..... 6
- 2.15** Are retail stores other than community pharmacies participating in this program? ..6

**Stay COVIDsafe** - If you have symptoms of COVID-19, **don't** go to a pharmacy to collect a rapid antigen test. Instead, check your state or territory health authority's [directions](#) on what to do. In most cases, this will mean you should go straight to a COVID-19 testing centre.

## 1. Patient Eligibility Questions

### 1.1 Who is eligible to receive a free Rapid Antigen Test (RAT)?

You are eligible under the program if you hold one of the following eligible concession cards:

- Pensioner Concession Card;
- Commonwealth Senior Health Care Card;
- Health Care Card (including Low Income Health Care Card); or
- Department of Veterans' Affairs Gold, White or Orange Cards.

To access your allocation of RATs under the Commonwealth Government's program, you or your carer must provide your eligible concession card number in person to a Participating Community Pharmacy. If you already receive deliveries from your Community Pharmacy (excluding via the Home Medicines Service) they will still need to sight your eligible concession card at the time of delivery, and record necessary details via a manual paper log.

You must also provide verbal consent to the Participating Community Pharmacy for them to record your concession card details into their pharmacy software (ProjectCOVID) for supply, compliance and Community Pharmacy reimbursement purposes.

### 1.2 I am on a concession card, but my spouse is not, are they eligible for free RATs?

No. Only patients who hold a valid concession card are eligible for free RATs under the program.

### 1.3 I have a concession card but I know it is no longer valid due changes in my circumstances. Am I still eligible?

No. Only patients who hold a valid concession card are eligible for free RATs under the program.

### 1.4 I'm a CTG patient. Am I eligible?

If you also hold a valid concession card then you are eligible for free RATs under program.

If you are a CTG patient but do not hold a valid concession card (see list above for the eligible concession card types) then you are not eligible for free RATs under this program.

### 1.5 Are there age limits? e.g. My daughter/son has a valid healthcare card but they are only 2 years old. Are they eligible?

There is no age limit for the program. As long as they a valid concession card number then they are eligible for free RATs under the program.

## CRTCA FAQs

- 1.6** My concession card is coming through mail but I have the number. May I present the number and not the physical card?

No. The pharmacy must sight your physical concession card prior to being able to supply any free RAT kits to you under the Commonwealth Government program.

## 2. General Program and RAT Supply Questions

- 2.1** I currently have symptoms. Do I go to a pharmacy to pick up a free RAT?

No. **Be COVIDSafe** – if you have any COVID-19 symptoms you should attend to your nearest COVID-19 testing site, or utilise RATs you already have in your possession.

**DO NOT** go to a pharmacy to pick up a RAT test if you have symptoms, or are considered a Close Contact/High Risk exposure.

Testing sites will provide you with either a PCR or RAT for free. These will not count towards your monthly/three-monthly limit of RATs under this program. Testing clinics can be found using the [Healthdirect website](#).

- 2.2** I'm an eligible patient. How many RATs am I allowed through the program?

You will be able to access up to 10 RATs over a three-month period, with no more than 5 RATs in any given month.

Please note pharmacies can only provide each eligible patient with one supply of 2 or one supply of 5 tests in the one day. Pharmacies are not able to provide you with a single test kit under this program. Therefore, if in any given month if you receive two supplies of two tests (i.e 4 tests in total) you will need to then wait until the following month to receive additional free tests.

- 2.3** If I used all of my RAT kits that I am permitted to receive under the program and need more, can I get more?

Eligible patients can receive up to 10 RATs over a three-month period, with no more than 5 RATs in any given month.

If you have already received your total allowable number of RATs then a pharmacy may provide you with tests however these will not be covered under the Commonwealth Government's program and you will be required to pay the pharmacy's retail price.

- 2.4** Does the monthly/three-month limit apply to each person on my concession card or is it per card regardless of how many people are on it?

Each patient who has an eligible concession card number can receive up to 10 RATs over a three-month period, with no more than 5 RATs in any given month.

For example, if you and your two children are on one concession card you can receive 15 RAT kits per month (5 for you and 5 for each of your children).

- 2.5** Can I get two nasal tests and two saliva tests on the same day?

Eligible patient can only receive a maximum of 5 RATs per day regardless of the type of RAT (nasal or saliva). The testing style of each RAT will vary from pharmacy to pharmacy depending on stock availability.

## CRTCA FAQs

**2.6** If I have COVID-19 symptoms and get free RAT tests from a testing clinic does this go towards my limit of 10 in the three-month period?

No. The tests available at testing clinics do not count towards your allowable limit of free RATs under this program.

**2.7** What if the RAT tests are inconclusive or faulty? Does it still count towards my monthly/three-monthly limit or can I obtain replacements through the pharmacy?

Unfortunately if a RAT test is inconclusive or faulty it will still count towards your limit under this program. You may wish to contact the manufacturer if you believe the RAT you received was faulty.

**2.8** How often can I get the RATs? I just got 5 tests today, when can I get the next lot of 5?

You can get a maximum of 5 RATs per month which are phased as follows:

- Month 1: 24 January 2022 to 28 February 2022
- Month 2: 1 March 2022 to 31 March 2022, and
- Month 3: 1 April 2022 to 30 April 2022.

This means if you have received 5 tests during a month then you must wait until at least the next month to receive further free tests. You can then pick up your further free tests at any time during the new month.

For example:

- If you receive 5 RATs on 27 January 2022 (Month 1) then you cannot receive further free tests until on or after 1 March 2022 (Month 2).
- If you receive 5 RATs on 31 March 2022 (Month 2) then you can receive another 5 RATs on or after 1 April 2022 (Month 3).

**2.9** I've waited until April to pick up any free RAT tests. As the program is continuing until 30 April can I pick up all 10 in April?

No. Eligible patients can receive up to 10 RATs over a three-month period, but no more than 5 RATs in any given month.

**2.10** I had a valid concession card and picked up some of my free RAT allocation but my concession is now no longer valid. Can I still collect the remaining tests for the month/three-month period?

No. If your concessional status changes during the month or three-month period you are no longer eligible to receive any further free RATs under the Commonwealth Government's program.

**2.11** I have lost my supplies and really need them. Can I get more?

Eligible patients can receive up to 10 RATs over a three-month period, but no more than 5 RATs in any given month.

If you are not already up to your limit for the month/three-month period then yes, you can pick up more from the pharmacy providing this does not put you over the monthly/three-monthly limit.

If however, you have already picked up your limit then no, you cannot get more free RATs under this program regardless of whether you lost your supply.

If you require more tests you would need to buy them from the pharmacy.

**2.12** Are all pharmacies participating in this program? If not, how do I find out where to get these RATs?

Participation in this program is optional for pharmacies.

There is no list available of which pharmacies are participating in this program however the Guild's Find a Pharmacy website (<https://www.findapharmacy.com.au/>) may show which pharmacies in your area have RATs in stock.

Alternatively, you can also search for your local pharmacy on <https://www.healthdirect.gov.au/australian-health-services> and check with your local pharmacy about whether they are participating in the program.

**2.13** I'm currently overseas but my concession card is still valid. Can someone pick it up on my behalf and mail it to me?

No. Federal legislation prohibits COVID-19 RATs to be sent overseas by post even if the person sending it is your relative and the RAT is for your personal use.

For more information see *Biosecurity (Human Biosecurity Emergency) (Human Coronavirus with Pandemic Potential) (COVID-19 Rapid Antigen Tests) Determination 2022* available at:

<https://www.legislation.gov.au/Details/F2022L00019>

**2.14** I went to all the pharmacies in my suburb and there is no stock available. How do I obtain any?

RAT stock is unfortunately currently scarce. You therefore may need to check with other pharmacies that are outside of your suburb.

The Guild's Find a Pharmacy website (<https://www.findapharmacy.com.au/>) may also be helpful to show which pharmacies have RATs in stock.

If you currently have COVID-19 symptoms you should instead go to a COVID-19 testing site. Testing sites will provide you with either a PCR or RAT for free. These will not count towards your monthly/three-monthly limit of RATs under this program.

**2.15** Are retail stores other than community pharmacies participating in this program?

No. Only community pharmacies can participate in this program, which is jointly funded between the Commonwealth Government and the State/Territory Governments of Australia.
