

MIDDLE SCHOOL NEWSLETTER

LITERACY & NUMERACY

In Content Knowledge students have begun their new unit 'Animals and ecology'. Students have enjoyed learning about food chains and food webs.

In Text Construction students have been learning about the difference between a complete sentence and a fragment. Students have also been constructing paragraphs from the information learnt in Content Knowledge.

In Numeracy students have been learning strategies for addition and subtraction. This week students have been practising using vertical addition and subtraction.

SKILL IN FOCUS:

Middle School students are continuing to focus on building resilience. Resilient children can recover from setbacks and get back to daily routines. Resilience develops when children experience challenges and learn to deal with them positively. This skill is particularly important given our upcoming Middle School Camp in week 4.

UPCOMING LEARNING

Content Knowledge: Animals & ecology

Text Construction: Sentences vs fragments

Numeracy: Addition and subtraction

Personal Learning: Camp preparation

Reminders

Further information about the **2024 Wyuna Middle School Camp** will be provided via Sentral by the end of the week.
