Term 3, Week 4 & 5, 2021

Over the past fortnight the children got the chance to explore the country of France at the program. The children participated in a range of different arts and crafts, such as making the Eiffel Tower out of straws, coloured in some French pictures, made a Rooster (national animal of France) from paper plates and feathers, created some fireworks out of pipecleaners, and best of all tasted some yummy croissants. The children really enjoy learning about other countries, as it gives them a chance to discover new things and create awareness of other celebrations that are going on around the world.

During the lockdown period, we like to make the program based around the activities and interests that the children enjoy doing most. This week we focused more on cooking activities, group games and being creative with different materials as these are the things the children love to do.
