

## Water for living things

Water is important for life. Plants need water to grow. Humans need water to drink. Fish need water to live.

### **Plants need water**

Water is essential for plants to be healthy, grow and live. Trees need water to grow. If seeds are too wet or too dry they will not survive. Plants drink water through their roots to stay healthy and grow.

### **Humans need water.**

Water is essential for the growth and survival of humans. If you don't have water you will die in three days. Water keeps humans hydrated.

### **Animals need water**

Animals need water to live. They use water for drinking and surviving. Fish and geese use water to live in.
