

- Tristan

At school, we currently have a rule where you are not allowed to ride bikes at school. I disagree with this rule and would like to change it. ~~The following paragraphs~~ Kids love to ride bikes, and my biking schedule system works.

~~Firstly~~ It is clear that we can't have the whole school riding bikes all at once, and I have a solution. The ~~6-4-2~~ system I have is we create several off bike tracks running through the school and for first break any grade 6's wanting to ride can. A second break grade 4's, then grade 2's. The next day it alternates with 5's, 3's, and 1's. Fridays there will be no bike riding.

There is no ~~doubt~~ doubt that kids love to ride bikes, and much more so with all their friends. We could have things like riding lessons, where we learn how to do proper bike checks, and how to cross and ride on roads safely and general rules about overtaking and winging ~~the~~ belts.

Lastly, it will encourage kids to ride bikes more often and ride to school. It will give parents,

kids to ride bikes or that run our phys.

We could we know

Two Stars and a Wish

Tristan

★ Great persuasive language.

★ Heaps of great examples.

★ Real good, could be a bit clearer.
