

EXPLORE THE WORLD OF ENDLER GUPPIES

Embark on a scientific journey to unravel the secrets of Endler Guppies, a mesmerizing freshwater fish with vibrant colors and intricate patterns.

RADICAL REPRODUCTION

Endler Guppies give birth to live baby fish, called fry. It's like having a fishy nursery in your tank! Watch as the fry swim and explore, just like mini-adventurers.

ORIGINS IN OASIS

Endler Guppies come from faraway Venezuela in South America. They love slow streams and ponds surrounded by lush plants.

Keep water clean with regular water changes.

WATER WISDOM

NUTRITIONAL NUANCES

Guppies are omnivores, feed them both plant and animal based foods.

Guppies are very social, however need peaceful tank mates to be happy.

COMMUNITY COHESION

TIPS, TRICKS AND TRIUMPS

Endler guppies are SUPER easy to care for!

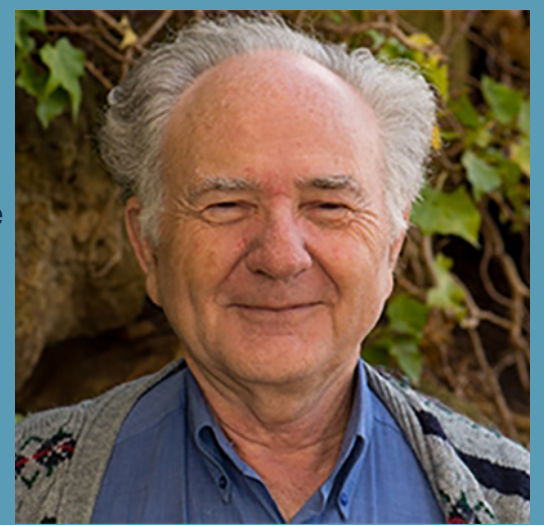

MAJESTIC MALES FADED FEMALES

Male Endler guppies are brightly coloured to attract a female. Females are plain and boring so they do not get predated on. This is called sexual dimorphism.

ENDLER'S ENDEAVOUR

Endler Guppies are named after John Endler, who paved the way for a deeper understanding of their biology and behavior.

LINKS TO LEARNING

A captivating and educational visual aid, allowing students to observe aquatic life cycles, behaviors, and ecosystems up close. It fosters a sense of responsibility, imparting valuable lessons in empathy and environmental stewardship.
