

Plastic Ain't Fantastic

Plastic Ain't Fantastic Day-

Girraween Public School is having a 'Plastic Ain't Fantastic' Day on the 11th December 2020. Children are to participate in this event by not bringing single-use plastics (plastic you can only use once). This event is a gesture to helping save the Great Barrier Reef and the environment from plastic pollution.

Why is GPS organising this event?

The reason for this event is to slowly start reducing the use of plastic. Plastic is one of the biggest threats (harm) to the Great Barrier Reef and the rest of the environment. We need to start lowering our waste of plastic. We need to Save the World!

PLASTIC ^{AIN'T} FANTASTIC

Plastic ain't fantastic
Day is a time where
we don't use plastic at
recess and lunch. We
should buy bulk packets
and pour them into little
containers. With the empty
packet we should put it
in special Recycling bins
that only take in soft
plastic.

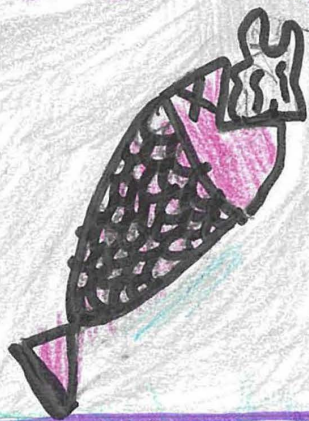

Plastic contains
harmful chemicals
that can kill animals
and people.
Animals can also
get tangled around
the plastic, thinking
it's food then
they choke on it
and die.

DECEMBER 11 FRIDAY

is Plastic ain't fantastic day. ☺

Single use plastic is plastic
that we only use once
and then throw away.

40%

The percentage of
marine mammals affected
by eating plastic.
