

International Students Mathematics Mentoring Program

Dear International Students and Family Members,

We are thrilled to announce a new program designed to support our international students in their mathematics studies! Starting this term, we will be running a Maths Mentoring Program aimed at helping international students succeed in their maths classes.

This program will be led by two passionate students, Elly Te from Year 11 and Kyle Te from Year 10. Both have consistently earned A grades in their maths tests and are excited to share their knowledge and study techniques with their fellow international students.

Our teachers have provided us with incredible support and assistance throughout our years at DSC. Motivated by their dedication, we wish to give back by assisting other international students at our school. International students, particularly Chinese students facing language barriers that affect their ability to solve math problems, will receive our dedicated support, as we are fluent in Chinese.

We are committed to creating a supportive and collaborative environment for all international students. This program offers a great opportunity for us to work through homework problems, prepare for tests, or simply improve our math skills. By working together, we can all grow and succeed together.

We invite all international students to join us every Tuesday after school at the International Learning Hub.

Sally HUANG
Director of International Student Program
