

Can you help make Albert Park Preschool's solar dream come true?

At Albert Park Preschool we have a dream of becoming an energy neutral Kindergarten. To achieve this dream and help care for our community and environment we would like to install solar panels.

Are you able to help us?

Thanks to the support of bhive Environmental, we have joined the Solar Schools Program and are on the hunt for 65 people to help us harness the sun's power for good by switching their electricity to Powershop prior to 31 July 2017.

Why make the switch to Powershop?

- For each person who makes the switch, Powershop will make a financial contribution to the cost of installing Albert Park Preschool's solar panels.
- There's no lock in contracts or exit fees.
- You have access to competitive rates, Powershop's App to help understand your usage and top-notch customer service.
- Switching only takes around 5 mins and you don't need to contact your existing power supplier - Powershop will do that for you.
- Powershop is Australia's first and only 100% certified carbon neutral electricity retailer and has been ranked Australia's Greenest Power Company for two years running (Greenpeace Green Electricity Guide 2014 & 2015).
