Labour Day

OSHClub will be closed that day

Mar 15

Pupil Free Day

Bookings are essential. Remember to pack a lunchbox.

TBC

OSHClub Morning Tea

Have a cuppa, on us!

Special Announcements

We need you...

We are collecting natural materials to create an indoor forest / camping site. We would love for you to share some sticks, logs or large stones, an old tent or teepee, if you have them!

What's been happening...

Almost there...

Hello all!

We hope you have been well and enjoying the first week of autumn. These past two weeks we have been focusing on sustainability by reducing waste, recycling, and reusing. We created a compost bin, made our paper recycling bins more visible and reused old boxes and cartons in our art and construction spaces.

Next, we will focus on our indoor and outdoor spaces where we will create and collect more natural materials and resources. We are replanting our garden bed with different types of veggies and herbs that we will be sharing with you as well as using these for our cooking.

Share your ideas with us on our Class Dojo! Simply comment on our posts or your child's portfolio.

With the end of the Term fast approaching, we are starting to plan for the upcoming school holidays. Please make sure your child is booked prior to the first week of the holidays as it helps us as well to organise resources and staffing.

See you all soon, have a lovely day :)

Club News

Club FOMO updates

Baking Class: This fortnight we have made some really yummy treats with our mini bakers. We made a Rocky Road slice from scratch and mug cakes. Children are becoming competent in their measuring and mixing skills as well as learning more about healthy eating and replacing high sugars with healthier options such as honey or rice malt and of course fresh fruit.

Science Lab: Science has always been a favourite at OSH. We have experimented with liquid viscosity, reactions of different components and learnt about catalysts. We made our exploding elephant toothpaste and wave in a jar.

Arts, crafts & DIY's: In our Arts masterclass, we created some amazing pour art by mixing paints in a cup and did some reverse painting with glow in the dark paints. The children had to create an image in the negative like old film reels, so when we used the UV lights, it would show what their image was.

We have 2 more weeks of FOMO left!
