

GRADE 6 CLASS NEWSLETTER

TERM 4, 2025

FROM THE TEACHERS...

Welcome to Term 4...

We hope you had a wonderful spring break, and can't believe we are embarking on our final term together already!

This term we have 11 weeks full of learning experiences. Please see below for the important dates we have coming up this term and remember to read the school newsletter to keep informed of what is happening at school.

We encourage you to contact your child's teacher if you have any questions about the term ahead.

A reminder that the following homework needs to be completed each week with diaries entered, signed and returned.

- **Reading:** at least 15 minutes, 3-4 times a week and write this in your diary with a parent signature.

Students will be responsible for sharing with their classroom teacher each Friday the reading they have completed.

- **Multiplication Facts:** say, write and play suggested games to learn multiplication facts and reverse division facts until all are mastered (up to 12 times tables)
- **Diary:** please sign each week regarding your child's completed homework.

We thank you for your continued support and look forward to another successful term, as your child works towards completing Primary School.

Kind regards,
Trent, Kate and Olivia

OUR TERM 4 LEARNING INTENTIONS

Religious Education

- We are learning about the call to mission through Scripture and story and in our contemporary lives.
- We are learning about the story of the birth of Jesus from the Gospel of Matthew.

English

- We are learning to apply reading strategies whilst reading a class novel (Can You See Me? And Nevermoor)
- We are learning to understand and apply new vocabulary during speaking, reading and writing
- We are learning to identify and discuss literary devices the author uses to build rising action and tension
- We are learning to edit sentences to include figurative language to create vivid and descriptive images when writing.

Mathematics

- We are learning to further develop our skills by calculating using conversions between fractions, decimals, and percentages.
- We are learning to use estimation when dealing with fractions, decimals, and percentages.
- We are learning to work with mathematical operations and problem-solving strategies.

Inquiry

- We are learning to understand Chemical and Physical Sciences.
