

## How to make a Succulent Garden by 2D

### What we needed:

A garden bed

Soil

Succulents

Large rocks

Spade

Hand trowels and hand forks

Hose and water

Students from 2D, 2A and Mr D.

### How we made it:

1. We chose a garden bed and scraped off all the old bark chips.
2. Mr.D dug it with his spade.
3. We broke up all the lumps with our hand tools.
4. We watered the garden bed with the hose.
5. We dug small holes and started putting in the succulent cuttings, and pressed the soil firmly around them.

6. We then gave them a good drink before adding a few large rocks to the bed.

7. And that's how to make a Succulent Garden!!!
