

What's been happening...

We hope everyone had a lovely break for the holidays, Term Three has started in full force. The last two weeks have been busy, we found the children back to transforming the space into the world of their possible! First up in Week One, the children were excited to discover that Ashlee and Tash had set up some special time dedicated to learning all about the benefits of self-regulation following both our schools using Zones of Regulation. Using games to help facilitate group participation of our Zones of Regulation, our inquisitive audience were gently guided in the importance of reading their bodies using a daily tool we set up on an interactive chart at the beginning of each session and then proceed to the floor area where they will participate in five minutes mindful breathing to help relax the mind, body, and soul. We have found the children really benefit from this and settle into activities and play with a clear mind.

STEM, a fun approach to science, technology, engineering, and mathematics that emphasises innovation, problem-solving and critical thinking. From creating our own rollercoaster using only sustainable materials such as egg cartons, straws, paper plates and cups and tape to seeing what floats in different liquids, the children love to explore and further their knowledge experimenting. The curiosity of STEM has followed through with many magical moments of arts and craft, learning the active ingredients required to achieve a lava lamp, making cookie-dough pizza, setting raspberry jelly inside the shell of a watermelon which the children happily scooped out and devoured later and even how maths is used in cooking measuring the ingredient. Finally, beginning Week Two we have welcomed two new children to our service who have settled in wonderfully and formed budding friendships with all the children and educators. We look forward to welcoming more new faces to our OSHClub team.
