PROGRAM OVERVIEW

This pathway program is designed for high school students aspiring to build a career in the pre-hospital health care sector. The **HLT31220 Certificate III in Basic Health Care** equips learners with essential skills and knowledge to operate as first aid or medical response workers.

This qualification is ideal for individuals providing first response care in environments such as industrial sites, first aid organisations, and the Australian Defence Force (ADF). It also serves as a foundational step toward becoming a registered paramedic by studying a Bachelor.

About us

Australian Paramedical College (APC) is proud to be Australia's leading specialist education provider in pre-hospital healthcare. With over a decade of experience, we've helped thousands of students gain the practical skills, theoretical knowledge, and confidence needed to thrive in the fast-paced world of emergency health services.

Feel free to check out our [website](https://www.apcollege.edu.au/vet-in-schools/) to learn more about APC.
