NIE | Simulated UCAT Day Workshop, Sydney

June 18, 2023

If you are in Yrs. 10, 11, 12, or you may be older and considering sitting the UCAT in the future, then this program is for you. The Simulated UCAT Workshop program is ideal and often a necessary step towards effective and efficient preparation for the UCAT.

This event will be conducted by the National Institute of Education in partnership in partnership with UCAT Preparation Australia, and MICAS (Medical Interviews and Career Advice Services).

The workshop is primarily designed to cover fundamental techniques in navigating all five sections of the UCAT test and also for participants to gain a better understanding of their own level of preparedness for the test. Over the course of the years, the program has evolved into more comprehensive and holistic exercise, which not only achieves its primary goal, but it is also exposing students to a wealth of knowledge about all other aspects of the journey into a medical degree.

UTS | Tech Festival 2023

June 19 to June 30, 2023

Hosted by the Faculty of Engineering and IT, Tech Festival brings current and prospective UTS students,

academics and industry together to foster learning, inspiration, share ideas and promote innovation. You won't want to miss this two-week festival of events, showcases, hackathons, workshops and seminars. <u>Find out more</u>

UOW | HSC Subject Support Series

June 19 to June 29, 2023

The HSC Subject Support Series is designed to help students improve their knowledge and understanding of key subject content and discover what HSC exam markers and assessors are looking for.

The series includes 12 free subject-specific online sessions, where participants will have the opportunity to ask questions and receive tips and strategies directly from the most qualified and experienced HSC markers in NSW.

- Each 1-1.5 hour webinar will cover:
- Key content and focus on specific modules
- Detailed analysis of difficult course content
- HSC marker insights on how to approach potential questions
- Strategies to prepare responses to questions

The HSC Subject Support Series will cover:

- English Advanced
- English Standard
- Mathematics Advanced
- Mathematics Standard
- Biology
- Business

There will also be time at the end for Q&A. Bring along any questions you have and have it answered live by a highly experienced HSC teacher/marker.

Each subject will be broken into two parts and content presented over two separate sessions. Find out more

University of Sydney | Nursing at Sydney

June 21, 2023

Nursing is one of the Australia's fastest growing employment sectors. UTAS | Rozelle Nursing Workshops

July 7 to July 14, 2023

Nursing is the launch pad to your career in health.

It will take you to places that you never thought possible. You could work in a huge range of areas including workplace safety, emergency medicine, and mental health. Plus, you'll make a real difference in the quality of life for your community.

This immersive workshop will provide Year 10, 11 and 12 students with an opportunity to explore real-world examples of research, study, and careers in Nursing.

Students will work alongside academics and researchers and experience hands-on activities, work through scenarios, and ask questions about career pathways and opportunities.

Activities include:

- Introduction to the Lab/Hand washing
- PPE/Vital signs
- Basic Life Support
- Bioscience

Applications close 22 June.

Top Scholarships for Indigenous Students

For many Indigenous students, particularly those living in rural and remote communities, accessing university or higher education can seem almost impossible. But thankfully, there are ways to make education more accessible and affordable; and one of them is through scholarships. In this blog, we'll look at some great scholarships for Indigenous students you might like to apply for.

Why should I apply for scholarships?

Scholarships can help unlock doors to higher education, empowering you to pursue your dreams without the burden of financial constraints. Scholarships could provide financial aid, covering tuition fees, accommodation expenses, textbooks, and sometimes even living allowances. They are awarded to students for a wide variety of reasons, including academic excellence, leadership potential, community involvement, and to help deserving students from underrepresented backgrounds.

Scholarships for Indigenous students

There are lots of government, university, and community scholarships out there to support Indigenous students. Here are some of the best ones we've found:

- <u>The Smith Family Indigenous Youth Leadership Program</u>: provides scholarships and leadership opportunities to young Indigenous Australians, with a focus on Indigenous youth from communities in very remote areas of the country or regional communities.
- <u>ANU National Indigenous University Scholarship</u>: acknowledging the academic excellence of Indigenous students in secondary school studies and providing assistance with costs related to tertiary studies.
- <u>Bendigo Bank Indigenous Scholarship Program</u>: for students who identify as Aboriginal and/or Torres Strait Islander looking to start their first year of tertiary study.
- <u>AMA Indigenous Medical Scholarship</u>: for Indigenous medical students who want to study medicine but may not have the financial means to realise their dream.
- <u>Rio Tinto Indigenous Scholarship Program</u>: financial support for Indigenous students in WA studying their first undergraduate degree.
- <u>Indigenous Student Success Program</u>: provides funding to universities so they can offer a variety of scholarships and support services dedicated to Indigenous students.

How do I apply?

Most scholarship applications these days are done online, so you'll need access to a computer or tablet and the internet. While each scholarship may have specific requirements, generally you'll need to submit an application form, academic transcripts, and a personal statement outlining your achievements, aspirations, and community involvement. Remember to highlight your unique experiences, cultural heritage, and resilience in overcoming challenges. Don't forget, you can always seek assistance from mentors, teachers, or scholarship support services if you need help putting your application together.

Dream big

Scholarships can provide a stepping stone towards fulfilling your dreams, whether that's becoming a lawyer, an engineer, an artist, or a leader in your community. Take advantage of these opportunities, be ambitious, and don't be afraid to dream big.

You can find more blogs about scholarships and search for opportunities on our website <u>here</u>.

Navigating the Skills Gap

Navigating the job market as a young person can be a complex process. Often, the conversation revolves around the "skills gap," suggesting that job seekers lack the necessary skills for available roles. However, the reality is often much more nuanced. The challenge frequently lies in a mismatch between what employers offer and what employees seek, rather than a simple lack of skills. Understanding this can empower young people to approach their job search strategically and find roles that truly fit their needs and aspirations. Here are three key insights to consider when you're searching for jobs.

Understand your value

In the modern job market, technical skills are just one piece of the puzzle. Employers are increasingly looking for employees who bring a diverse range of experiences, interests, and transferable skills to the table. These can include communication skills, problem-solving abilities, leadership qualities, and adaptability. These skills can often be developed through various life experiences, not just formal work roles. For instance, involvement in community projects, sports teams, or volunteer work can all contribute to your skill set. So, when considering your value as a potential employee, don't just focus on your technical skills. Think about the broader range of skills and experiences you can offer and how these could benefit a potential employer.

Consider job conditions

The conditions under which you work can have a significant impact on your job satisfaction. This includes factors like the hours you work, whether you can work remotely, the culture of the workplace, and the level of job security. For example, you might have the skills to work in a high-pressure corporate environment, but if you value work-life balance, this might not be the right fit for you. Similarly, you might be technically qualified for a job that requires a lot of travel, but if you prefer to stay close to home, you might not be very happy. When considering a job, make sure to take into account the working conditions and think about whether they align with your lifestyle and personal preferences.

Communicate your expectations

Clear communication is key in the job market. If you know what you're looking for in a job, don't be afraid to express this to potential employers. This could be during the application process, in an interview, or once you're in the job. For example, if you value opportunities for professional development, make this clear. If flexible working hours are important to you, let them know. By being open about your expectations, you can help to reduce the mismatch between what employers offer and what employees are looking for. Remember, it's not just about finding a job – it's about finding the right job for you.

Remember, the skills gap is often less about a lack of skills among job seekers, and more about a mismatch between what employers offer and what employees are looking for. By understanding this, you can better navigate the job market and find roles that are a good fit for you.

Interested in learning more about the world of work? Read more on our website here.

Finding Work Experience for Students with a Disability

We all know the power work experience can have for young people when they're considering future career options. And while placements can be tricky to come by, for students with a disability, the barriers are even higher. But this shouldn't discourage you from trying to find work experience; there are plenty of reasons why you should, and lots of employers who are willing to work with you. In this blog, we'll take a look at the importance of work experience, and how students with a disability can find options suitable for them. Let's get started.

Why is work experience important?

There are a number of reasons why you might like to try work experience, including:

- Seeing if a job might be the right fit for you
- Getting experience in the workforce
- Building important soft skills
- Gaining confidence and independence

For young people with a disability, finding work experience is even more important. In Australia, <u>only 53.4% of people</u> with a disability aged 15–64 years are engaged in the workforce (compared to 84.1% of people without a disability).

By engaging in work experience while you're still at school, you can be better equipped to enter the workforce with the skills and knowledge employers are looking for.

What to consider when searching for work experience

Individual considerations and needs when looking for work experience placements will vary from person to person. People with physical disabilities will need to look at things like building and facility access, while a student who is deaf might need assistance with interpreting. You know your own needs better than anybody else, so take these into account when looking for work experience.

When looking at specific employers, you might also like to do a bit of extra research about them to see if they might be a good fit. Do they currently employ other people with a disability? Have they implemented a <u>Disability Action Plan or Accessibility and Inclusion Plan</u>? Can you read reviews or talk to current and former employees about the workplace's culture and values?

Finding work experience for students with a disability

Your school is usually your first point of contact when searching for work experience. Talk to your careers advisor and see if they can assist you in finding a placement.

If you have a <u>Disability Employment Services (DES) provider</u>, they can also assist with finding work experience appropriate for your needs.

You might also like to engage in a local program like <u>Ticket to Work</u>, which includes career development and employment pathway support (you can also listen to their <u>podcast</u> exploring the world of work for young people with a disability).

If you see an opportunity <u>online</u> that looks interesting, you can always get in touch with the company and ask if they can support you.

And don't forget about the power of <u>family and friends</u>. They can help you search for opportunities, or might be able to offer something that's perfect for you.

MSC Letter Writing Project – Competition

To celebrate World Ocean Day in 2023, the Marine Stewardship Council (MSC) is hosting a challenge for schools to write a letter to fisher! After exploring one of the fishery case studies in the lesson plan, students write their letter to a sustainable fisher.

In their letters, students may like to:

- Share why their love the ocean
- Share their own experiences with fish and fishing
- Give thanks to fishers for the hard work that they do, providing nutritious food for us to eat
- Explain why they think that sustainable fishing is important

Students are highly encouraged to include drawings, paintings, or other creative expressions! When the letters are delivered, the MSC will create a short film together with the fishers, so that students can see the fisher's responses.

All participating students will be entered into a random prize draw to win a \$50 ALDI gift card. One entry will be given per student letter.

The school that sends the most student letters overall will also be eligible to win a virtual classroom with a fisher, during which students can ask all of their questions about marine life, fishing, and life on board a fishing vessel.

Competition closing date is 31 July, 2023. Find out more <u>here</u>.

Supporting Refugee Friends in High School

Did you know there are over <u>11,000 refugee students</u> currently in public schools in New South Wales alone? Being a supportive friend can make a world of difference to someone who has experienced the challenges of displacement and starting anew. In this blog, we'll explore some simple yet impactful ways you can lend your support. So, let's dive in.

Show empathy and listen

When it comes to supporting your refugee friends, empathy is key. Put yourself in their shoes and try to understand the unique struggles they may be facing. Offer a listening ear and create a safe space for them to share their experiences. Sometimes, all they need is someone who genuinely cares and is willing to listen without judgment.

Learn about their culture

One fantastic way to show support is by taking an interest in your friend's culture. Ask questions, explore their customs, traditions, and celebrations. This not only helps you develop a deeper understanding of their background but also shows your friend that you value their heritage. You might even discover some incredible similarities or shared interests along the way.

Offer language assistance

Language barriers can be daunting for refugees, especially in an academic setting. If your friend is still learning the local language, you can offer your help. Simple gestures like explaining unfamiliar words, practising conversations, or even recommending language-learning resources can make a significant impact. Your support can boost their confidence and help them navigate their new environment more comfortably.

Include them in social activities

High school isn't just about academics; it's also a time for building friendships and creating memories. Including your refugee friend in social activities can help them feel more connected and integrated. Invite them to hang out with your friend group, participate in extracurricular activities together, or attend school events. Your inclusion and acceptance can make a world of difference in their overall wellbeing.

Be a peer mentor

As a high school student, you possess unique skills and knowledge that can be of immense help to your refugee friend. Offer your assistance as a peer mentor, helping them navigate the ins and outs of the education system, offering study tips, and providing guidance on coursework. By sharing your knowledge and supporting their academic journey, you're empowering them to thrive in their new school environment.

Advocate for inclusivity

Advocacy is a powerful tool for change. Speak up for inclusivity and support initiatives that promote diversity within your school community. Collaborate with student groups, organise cultural events, or initiate conversations about refugee rights and integration. By taking a stand, you're actively fostering an environment of acceptance and understanding.

Connect them with resources

There are various organisations and resources available that specifically assist refugees in their integration process. Take the time to research local organisations and programs that can provide support to your friend. Share this information with them, helping them access valuable resources such as language classes, counselling services, or mentorship programs. Your effort in connecting them to these resources can make a tremendous difference in their lives.

Remember, the little acts of kindness and support you offer can have a profound impact on a person's wellbeing and sense of belonging. By embracing empathy, promoting inclusivity, and being a supportive friend, you can make a positive difference in their life.

You can find more wellbeing resources on our website here.

<u>University Spotlight – Charles Darwin University</u>

Find out what it's like to study at Charles Darwin University in this University Spotlight.

Campuses & Access

Charles Darwin University is the Northern Territory's only university, with five main campuses and seven smaller study centres. Their four NT campuses are located in Casuarina, Palmerston, Katherine, and Alice Springs, and they have a fifth campus in Sydney. Study centres are spread across Brisbane, Darwin, Katherine, Melbourne, Perth, Tennant Creek, and Nhulunbuy.

Public bus services can be used to travel to the Casuarina, Palmerston, Alice Springs, and Sydney campuses. Parking is available at all campuses for students who wish to travel by car.

Most of the paths and buildings across all campuses are accessible by wheelchair, with buildings containing lifts for access to upper floors.

Online Learning

CDU offer a large variety of courses to study fully online, covering all study areas.

Online students have access to 24/7 academic and tech support. You can also choose to study some courses in mixed mode (a blend of both on campus and online).

Find out more about studying online at CDU <u>here</u>.

Study Options

CDU offer undergraduate courses in all standard study areas, including the <u>Bachelor of Clinical Sciences</u> which is the only pathway to studying medicine in the NT. They are also a major provider of VET courses in the Northern Territory as well.

CDU currently do not offer double degrees.

The academic year is split across two semesters. They also offer an optional Summer semester. There is a midyear break between semesters. Classes are not scheduled over the Christmas and New Year period. You can view the full academic calendar for the year <u>here</u>.

The structure of most courses at CDU is quite rigid, with subjects only offered in certain semesters and must be taken in a set order. You can find out more about specific courses and subjects <u>here</u>.

Accommodation & Living

CDU offer on campus accommodation at their Casuarina, Katherine, and Alice Springs campuses.

2023 prices for accommodation vary between \$185 to \$259 per week per person, depending on room size and location. The fees include all utility bills – electricity, water, and internet (Wi-Fi). All room options come fully furnished. There are also lots of facilities on-site at each location, including a swimming pool, study rooms, and laundry services.

Contracts are offered on either a short- or long-term basis. Students must reapply for accommodation at the end of their contract.

<u>UniLodge</u> also offer private student accommodation in Darwin.

You can see all accommodation options and application processes here.

Living off campus in Darwin can get quite expensive (the <u>current median rental price</u> for an apartment in Darwin City and surrounding suburbs varies from between \$400 to \$600 per week), and rental options are generally highly competitive. More affordable options further away can mean a very long travel time to and from campus. Rental options close to regional campuses in <u>Katherine</u> and <u>Alice Springs</u> are much cheaper compared to city prices.

Campus & Teaching Facilities

There are cafés and eateries at most CDU campuses, and individual campuses have facilities that include gardens, a post office, recreation facilities, and dedicated study spaces.

The Casuarina, Alice Springs, and Sydney campuses have a dedicated library, and all campuses have specialist teaching facilities, including lecture theatres, practical training hubs and facilities, and laboratories.

CDU's smaller study centres provide a space for remote and online students to study, including access to support services and internet.

You can find out more about CDU's on-campus facilities here.

Student Support

Charles Darwin University offers a wide variety of dedicated student support services, including academic and study support, disability and inclusion support, support for LGBTQIA+ students, support for Indigenous students, health and wellbeing services, and financial support services. Information about support services can be accessed on their website here.

Career Development & Industry Partnerships

CDU offers a variety of <u>career services</u> for current students and graduates. CDU has strong links to local industry, government, and the Defence Force, and are part of the <u>Darwin</u> <u>Innovation Hub</u>. Their <u>First Nations Leadership</u> portfolio also focuses on Indigenous engagement and success. **Information Accessibility**

CDU's website is modern and easy to navigate, with functionality that works across all major browsers. It has a handy search function and essential information about courses, scholarships, and support options are easy to find.

Tours & Information Sessions

CDU run both online and on campus information events for future students regularly throughout the year. You can view the upcoming calendar of events <u>here</u>. Year 12 students can also book in for a one-on-one chat <u>here</u>.

Next Steps

If you're interested in study at Charles Darwin University and want to find out more information, the best way to do this is to contact them, either by phone on 1800 061 963, or by submitting an <u>enquiry online</u>. CDU also run one Open Day at each campus a year – the <u>Casuarina Open Day</u> is on 19 August, and the <u>Palmerston Open Day</u> is on 2 September (Katherine and Alice Springs Open Days have passed for 2023).

Looking to the Future: Young People and Mental Health

Life as a young person can sometimes feel tough, especially in the midst of the COVID-19 pandemic, political uncertainty, and concerns about the environment. A <u>recent study conducted by the University of Melbourne</u> across schools in Australia sought to understand the experiences and perspectives of high school students. The findings shed light on the challenges faced by young people today and emphasise the importance of addressing their needs. Let's explore the key takeaways from this research.

Pessimism and mental health

The main thing the study revealed was that many young people experience feelings of pessimism and uncertainty about the future. The pandemic intensified these emotions, affecting personal and social relationships and altering how young people perceive what lies ahead. Mental health struggles were also evident, with a significant percentage reporting feeling mentally unhealthy. It's also worth noting that students living in cities were more likely to experience mental unhealthiness compared to their rural counterparts.

Mental health and life satisfaction

The research highlighted the close connection between mental health and overall life satisfaction. They found that those who reported feeling mentally healthy were more likely to be satisfied with their lives. On the other hand, those who felt mentally unhealthy were less satisfied. This underscores the crucial role mental health plays in our overall wellbeing.

The impact of the pandemic

The ongoing effects of the COVID-19 pandemic have significantly impacted young people's mental health. The disruptions it caused, such as changes in social dynamics and personal losses, have taken a toll on overall wellbeing. Many students expressed their struggles with motivation and studying, highlighting the challenges they face even as we reach the other side of the pandemic.

Hope for the future

While the study revealed concerns and uncertainties, it's not all doom and gloom; it also highlighted that a majority of young people feel optimistic about their personal future. However, fewer than half expressed optimism about Australia's future, and an even smaller fraction were optimistic about the future of the world. This widespread sense of hopelessness reflects the need for addressing global challenges and creating positive change.

Youth empowerment and mental health support

One common theme that emerged from the students' comments was the desire for young people to be heard and included in important discussions. They also emphasised the urgency of addressing climate change and the environment. Furthermore, the study underscored the need for improved mental health services, with students expressing concerns about the limited support available.

Taking action and building positive futures

This study adds to the growing body of evidence highlighting the severity of mental health issues among young people. It is essential to revamp the ways we engage with young people, both within formal institutions and through public conversations. By listening to their needs and desires, we can better support them in navigating these challenging times and building positive futures for themselves, Australia, and the world. What is it Like to Work in a Vet Clinic?

Veterinary clinics serve as a vital hub for the health and wellbeing of animals. They provide comprehensive medical care, diagnostics, and treatment for pets and other animals. Vet clinics play a crucial role in preventing and managing diseases, promoting animal welfare, and ensuring the longevity of our beloved companions. Vet clinics offer a wide range of services, including routine check-ups, vaccinations, surgical procedures, dental care, and emergency treatments. Additionally, they also often serve as a source of education and guidance for pet owners, offering advice on nutrition, behaviour, and general pet care.

While each vet clinic is different, there are some common threads between them:

- 1. Communication is key not only with your fellow co-workers, but with clients as well.
- 2. A love for all animals you'll need to be willing to work with and care for all sorts of animals, from dogs and cats to horses, birds, and even reptiles.
- 3. You'll need to be tough some of the work can be hard, both physically and emotionally, but incredibly rewarding as well.

Key Outcome

Care for pets and animals

The key outcome of a vet clinic is to promote and safeguard the health and wellbeing of animals. **Key Tasks**

- Conduct physical examinations and health assessments of animals.
- Administer vaccinations and medications.
- Assist in surgical procedures.
- Perform diagnostic tests, such as blood work and radiographs.
- Supervise animals kept overnight.
- Educate pet owners on proper animal care and nutrition.
- Maintain accurate medical records and patient information.
- Clean and sanitise clinic spaces.
- Order and manage inventory of supplies and medications.

Industry

You can find vet clinics in the professional, scientific, and technical services industry

Vet clinics are generally found in the professional, scientific, and technical services industry. There are a few different kinds of vet clinics, including exotic animal clinics, mobile clinics, farm animal clinics, and emergency clinics, just to name a few.

Work Environment

You can expect regular hours and on-site work

Regular hours | Work on-site | Jobs in metro, regional, and rural areas | Very strong job growth Most vet clinics are open the usual 9 to 5, and are often open on weekends too. Additionally, many clinics offer emergency after-hours services, so you might find that you need to work at night and during holidays as well. The nature of work in a vet clinic typically requires hands-on interactions with animals, so remote work or working from home is uncommon. But some administrative tasks and even telehealth services can be done remotely.

Vet clinics can be found all across the country, though the kinds of animals you can expect to care for might differ between locations (e.g. farm animals will be much more common in rural areas).

The Career Clusters you'll find in a vet clinic

People from all Clusters are needed for a vet clinic to run successfully, but the most common Clusters you'll find are Guardians and Makers. In many roles, you might find yourself performing tasks across multiple Clusters.

What do Makers do in a vet clinic?

Makers in a vet clinic help to maintain the clinic's facilities and equipment. They keep the place clean and sanitary and ensure that vital equipment is in good working order. Makers also handle and safely store diagnostic samples and operate specialist equipment (such as x-ray machines). Some Makers might help with transporting animals to and from clinics, homes, and farms.

- Cleaners
- Lab Technicians
- Maintenance Technicians
- Animal Transport Specialists

The Linker's role in a vet clinic

Linkers are generally a client's first point of contact in a vet clinic, assisting customers with queries in person or on the phone. Many vet clinics may also sell products such as food, equipment, and medicines, and need Linkers to offer these products to clients. Lots of clinics also have an online or social media presence that will be managed by a Linker.

- Receptionists
- Social Media Managers
- Sales Representatives

Where you'll find Coordinators in a vet clinic

The duties of a Coordinator in a vet clinic can include scheduling appointments, coordinating staff schedules, managing client records, ordering equipment, and handling budgets and finance. They take care of much of the behind the scenes work in a vet clinic, ensuring it can operate smoothly.

- Clinic Managers
- Administrative Assistants
- Accounts Managers

What do Informers do in a vet clinic?

Informers pass their specialist knowledge of animals on to both clients and other workers in a vet clinic. They might research and advise on animal development, behaviour, and nutrition. A lot of the work a veterinarian does is as an Informer, providing advice to clients on proper care for their pets.

- Animal Behaviour Specialists
- Animal Researchers
- Veterinarians

The role of Innovators in a vet clinic

While Innovators might not work directly at a vet clinic, they are responsible for designing and engineering the important equipment used in clinics, as well as the initial layout and construction of facilities. Some Innovators might provide graphic and UX design services for a vet clinic, helping with creating logos and websites.

- Engineers
- Architects
- Graphic/UX Designers

How do Guardians work in a vet clinic?

Guardians are the most common Clusters you'll find in a vet clinic, helping to promote and assist with the health and wellbeing of animals. They are responsible for performing diagnostic tests and providing treatments and care, including surgery. Guardians might also provide grooming and training services to clients.

- Veterinarians
- Vet Nurses
- Pet Groomers
- Animal Trainers

How do we expect working in a vet clinic to change in the future?

The work in a vet clinic is likely to undergo several changes in the future, driven by advancements in technology, evolving pet care trends, and shifts in veterinary medicine.

The use of telehealth services is expected to increase, allowing vets to provide virtual consultations and remote monitoring and guidance to pet owners, enhancing accessibility and convenience.

There is also a growing awareness around preventative care, including proactive wellness programs, nutrition

advice, and early disease detection, with an emphasis on keeping animals healthy and preventing future health issues.

With advances in technology, AI-powered tools and algorithms could potentially assist in diagnostics, data analysis, and treatment recommendations, augmenting a vet's expertise and supporting decision-making. Vet clinics may also place increased emphasis on sustainability practices, such as reducing waste, adopting ecofriendly products, and promoting responsible pet ownership.

How to become a Pathology Collector

Pathology Collectors (also known Phlebotomists, who generally only collect blood samples) collect samples of fluids and tissues from patients that could help diagnose illnesses and other issues. They're also responsible for storing and preparing the samples for transport to pathology labs for processing and analysis. If you're good at multi-tasking, have great people skills, are highly organised and great at following rules, becoming a Pathology Collector could be a career to explore.

About you:

- Sympathetic, calm and a great communicator
- Pays attention to details, follows instructions and procedures to the letter
- Steady hands with good practical skills

The job:

- Check personal details, explain procedures to and help reassure patients
- Obtain required samples using strict procedures to prevent contamination
- Keep the working environment clean, hygienic and prevent cross-contamination
- Store and label samples correctly, then deliver them to the lab within strict time frames
- Keep accurate and updated patient, test, and equipment records

Lifestyle Impact: Low

- Part Time opportunities: High around 59% workers are part time (source: labourmarketinsights.gov.au).
- Average hours for full-time workers: 40 hours per week (source: labourmarketinsights.gov.au).
- Pathology Collectors' salary (median): \$40,000 per year (source: ato.gov.au).
- Future career growth: Very strong (source: labourmarketinsights.gov.au).
- There are limited opportunities to work from home and limited jobs in regional areas.

Pathology Collectors are in demand in these locations:

Demand for Pathology Collectors is highest in Victoria, Western Australia, and New South Wales (source: labourmarketinsights.gov.au).

How to become a Pathology Collector in Australia

The minimum qualifications you'll need to become a Pathology Collector in Australia are a Certificate III in Pathology Collection (from an approved educational institution) and a current first aid certificate.

Step 1 – Study Maths, English and Biology at high school.

Step 2 – Complete the required qualification:

- <u>Certificate III in Pathology Collection</u>
- <u>Diploma of Laboratory Technology</u>

Step 3 – If you don't already have one, you'll need a full <u>driver's license</u>.

Step 4 – Become first aid certified.

Step 5 – Obtain relevant work experience, or complete the required number of hours supervised work placement as part of your training.
