

## Junior - Grades 1 & 2 Specialists Term 3 Overview

### Mandarin

In Term 3, students will be working on topics related to colours, fruits and activities in Mandarin. They are going to focus on matching information heard with pictures or other visual clues, such as identifying colours and fruit in game and real-life situations.

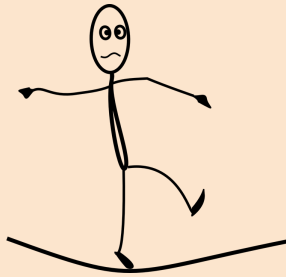

### Performing Arts

Students will explore dance through body and space. They will trial ways of safely using the whole body, different body parts, bases and zones to communicate ideas, experiences and feelings. This will be done through a variety of improvised and structured movement activities.

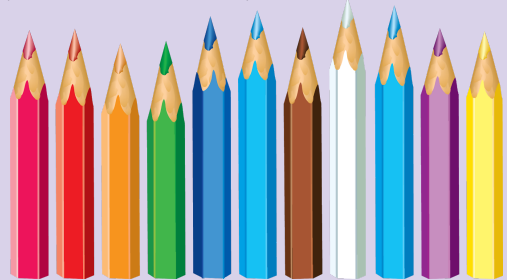

### Physical Education

Students are being introduced to the fundamental motor skills of balance, forward roll & safe landing. They will be looking at these skills in a variety of ways; minor games, obstacle courses and tabloid stations.

### Visual Arts

Students will explore character strengths through art tasks with an aim to build resilience. Focusing on art elements and principles such as line, shape and colour, to create paintings, drawings. At home families can support your child by encouraging them to 'draw for fun' exploring art which relates to their interests is a good way to promote enjoyment in learning.

### STEM

Students are exploring how to use technology in healthy ways. They are being introduced to the different purposes that digital systems have and ways we can use data as symbols in order to code robots. Students will then be learning a new block code program to solve one of three challenges.
