

UGLY SPOTS

Firstly, there are ugly spots around our school and we need to fill them somehow with some plants that survive by themselves like natives. For example: around the oval, behind the year threes and behind the year fours.

1

NEW PLANTS

Secondly, around the school there are some old places we can replace them with some new native plants that can grow and water themselves.

MORE PEOPLE

Thirdly, if we planted more plants around the school more people will in roll and we will have more students and teachers in our school.

CONCLUSION

Please can you agree , we worked so hard on our project . Planting more native plants around the school would be great ! Thank you for listening.
