Community Update

August 2024

City of Port Phillip – pop-up bike routes

It's important for everyone in our community to safely enjoy our streets, that's why we installed over 36kms of new and improved pop-up bike routes to make it safer and easier for people to move around the City of Port Phillip.

We commenced construction on the City of Port Phillip pop-up bike routes in May 2022 and collected valuable data throughout the trial period.

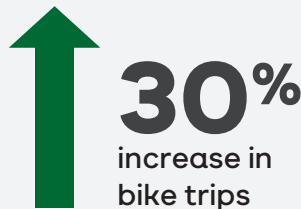

The pop-up bike routes on the majority of local roads within the City of Port Phillip were removed following a formal request from Council.

Improvements for bike riders on Marine Parade remained following trial findings.

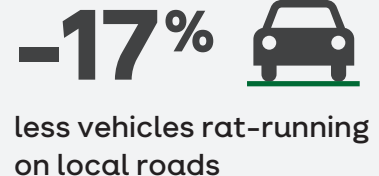

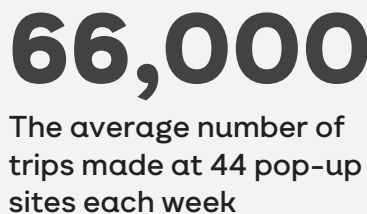

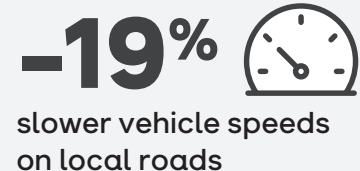

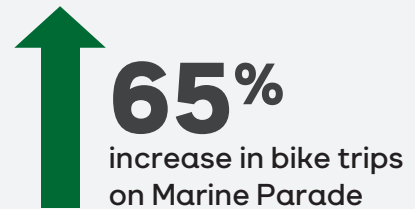

Ridership along Marine Parade increased during the trial, including a 71% increase in commuter riding. Perceptions of safety also rose, with 69% of people surveyed on Marine Parade saying the pop-up bike lanes had improved safety for them while they ride.

What's next?

In 2022 we installed temporary bike infrastructure along Marine Parade as part of the Pop-up Bike Lanes Program to improve safety and connectivity on one of Melbourne's busiest bike corridors.

We installed sections of separated bike lanes, green surface treatments, signage and line markings along Marine Parade to improve safety and raise awareness of people on bikes.

We're now consulting with the community to determine the next steps for Marine Parade.

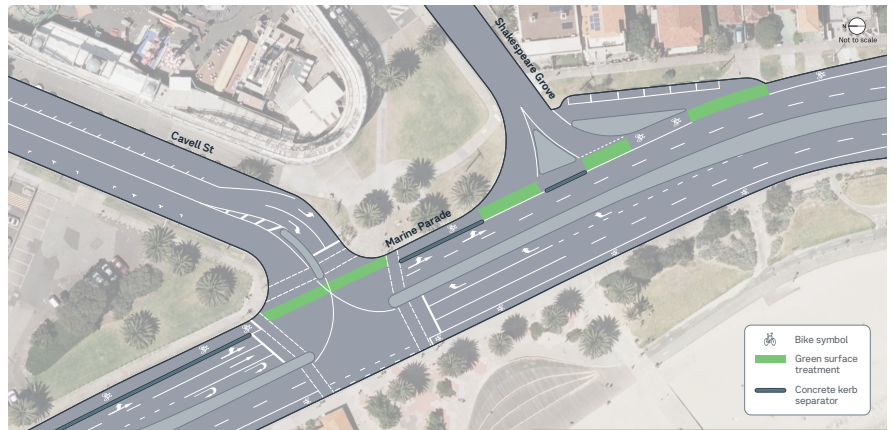

Understanding what's important to the community is essential so we can design an effective solution which meets the needs of the community and all road users.

Provide your feedback

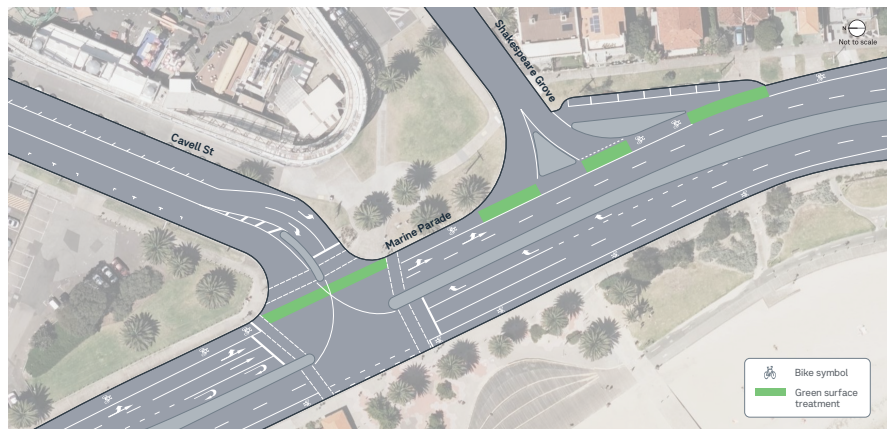

We're consulting on three options to understand community sentiment on the next steps for bike lanes on Marine Parade:

- **Option One:** convert the temporary treatments into permanent infrastructure using kerb separators and white line markings to improve safety for all road users.
- **Option Two:** remove the temporary kerb separators and bollards along Marine Parade but retain other safety improvements including green surface treatments, signage, and line marking.
- **Option Three:** remove the temporary treatments and reinstate the original road condition. Green surface treatments will remain at some locations to raise awareness of people on bikes.

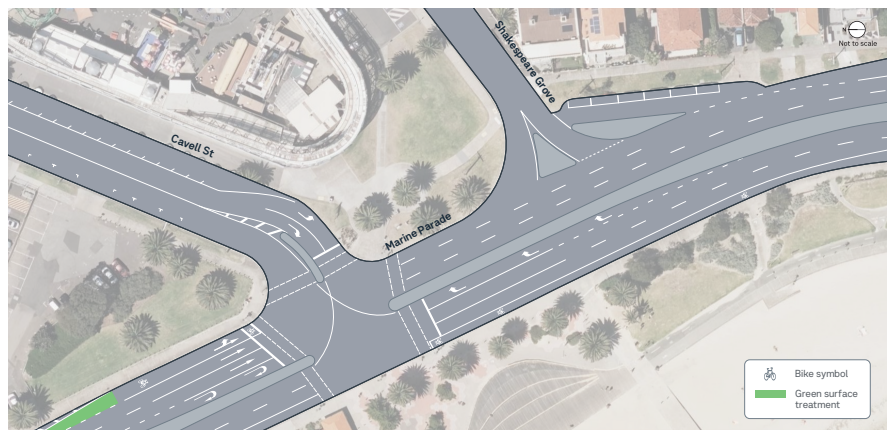

Visit engage.vic.gov.au to provide your feedback. Community feedback will inform how we progress.
