

## Summer is better than Winter! By Ruby.K

I believe that summer is better than winter because summer means more time outside in the sun. In summer you also have a school holiday. Days last longer in the summer too.

Summer means more time to play. In summer the suns out and that means you can get lots of vitamin d to survive. In winter its always cold and rainy and uncomfortable but in summer its nice and hot so you can go to the beach and play sports like basketball and cricket.

In summer you have a holiday so that means no school and more time with family and friends. In summer you can sleep in because you don't have to wake up early to go to school. In summer everyone is on holiday and having fun. In winter you have to stay inside whilst it's raining outside.

Days also last longer in summer because we have daylight savings. Daylight savings means an extra hour in the day which means more time to play and hang out with friends and family. You also get one less hour of night time and less time to sleep.

Really good use of  
examples!

well done ✓
