

## Term 4 Performing Arts Curriculum Overview 2024

In Performing Arts this term, the focus for all year levels will be in Music will continue, as we delve deeper into essential musical concepts: rhythm, pitch, form and structure, purpose and context, and tempo. This term, however, we will shift our approach from using musical instruments to emphasising the power of the human voice through singing.

The culmination of this term will be the opportunity for students to showcase their skills in front of an audience during the end-of-year Christmas Carols on Thursday 5 December. This performance will not only serve as a practical application of what they've learned, but also help build their confidence as performers.

The skills developed this term will lay a strong foundation for the singing component of the 2025 whole school production. By honing their vocal abilities and understanding musical concepts, students will be well-prepared to participate in larger ensemble work, enhancing their collaboration and teamwork skills.
