Have a cuppa, on us!

Special Announcements

We need you...

We are collecting natural materials to create an indoor forest / camping site. We would love for you to share some sticks, logs or large stones, an old tent or teepee, if you have them!

What's been happening...

Almost there...

Hello all!

These past two weeks we have been completing our Sustainability projects and FOMO Clubs. We are noticing a positive change in children's confidence, resilience, and engagement in experiences. We love to see them work together and run their own activities and ideas. Children are expressing themselves in very positive ways and show care and empathy to each other.

Next, we will focus on setting up our environment for the upcoming school holidays. We would like to keep our campsite and dress up area as all children are enjoying this so much. If you have any suggestions, we would like to hear them.

We have put a mini survey together, to test the effectiveness of Class Dojo, this will take you less than a minute to complete. Simply scan the QR Code:

[With the end of the Term fast approaching, we are starting to plan for the upcoming school holidays. Please make sure your child is booked prior to the first week of the holidays as it helps us as well to organise resources and staffing.](#)

See you all soon, have a lovely day :)

Club News

Club FOMO updates

Baking Class: This fortnight we have made some really yummy treats with our mini bakers. We made truffles and next is cake pops. Children are becoming competent in their measuring and mixing skills as well as learning more about healthy eating and replacing high sugars with healthier options such as honey or rice malt and of course fresh fruit.

Science Lab: Science has always been a favourite at OSH. We have experimented with liquid viscosity, reactions of different components and learnt about catalysts. We made our exploding elephant toothpaste and made our own slime.

Arts, crafts & DIY's: In our Arts masterclass, we created some amazing art with hydro dipping and did some finger knitting to make bows and butterflies. The children also suggested for us to practice face painting. Due to Covid though we settled for arm painting.

We have 1 more week of FOMO left!
