Study Instrumental Music

Why study music?

Music has been shown through multiple studies to improve overall brain development, social growth, pattern recognition and reasoning, fine motor skills, and multiple other characteristics shown in high-accomplishing individuals.

How it works:

STUDENTS ATTEND WEEKLY LESSONS

Students receive a rotating 50min weekly lesson in a small group environment, focussing upon skill development and repertoire mastery.

STUDENTS JOIN THE CONCERT BAND

Students join the school concert band which rehearses once per week (brass, woodwind, percussion students).

STUDENTS PRACTICE AT HOME

There is an expectation that students continue practice at home multiple times per week to provide continuity and improvement.

JOIN FOR NO COST

Students are not charged tuition fees, but hiring an instrument will incur an annual cost (subject to availability). Students are able to bring their own instruments.
