

Media Arts Banksia

Teacher's Note

In Media Arts this term, Banksia students have been learning to make characters and visual stories. In doing so, we also continued to work on our photography, digital camera and photo editing skills.

Students spent time planning and creating various characters, including a superhero. Then, they practiced media skills, such as filming and photography to bring their superhero to life.

It was fantastic to see students be creative and build on their knowledge of cameras and editing to make various media artworks. By the end of the term, they had the opportunity to showcase their skill in either a stop motion video or trailer.
