## WHO WE ARE

### What we are trying to achieve...

We are the Year 9 Semester 1 LEAD class of 2020. Tragically one of our fellow classmates, Dylan Briggs died while riding his bike home from school in March 2020. The Chill Out & Look About initiative aims to improve road safety awareness for all road users. We want to make sure people are safe when walking, or riding home from school, and in future, our aim is to help our roads become a much safer place. Futhermore, to educate drivers to be more attentive when behind the wheel. We want parents to feel assured in knowing that their children are safe when walking home from school.

# WHO IS DYLAN?

## His Story

Dylan was an amazing person who was a big part of our lives, he was confident and strong and never failed to make us all laugh. Dylan was an active part of our lead class and school. He had a bright personality, and was into super heroes. In the end, he was a super hero himself. As a LEAD class, we are trying to make our roads safer in honour of Dylan, with the support of his family and our community. We want to educate our younger generation. Together we can help prevent this devastating event from repeating itself.

# THE LOGO

## And The Story Behind It

The super hero logo was a simple idea that was important to Sarah-Jane, Dylan's mum.

Dylan loved Marvel and DC characters (particularly "The Flash"). Sarah wanted Dylan's legacy to be associated with him being a superhero. Dylan's last gift was one of organ donation, through that he has saved lives. A true Hero!

The logo and emblem will be synonymous to Dylan being "on watch"...looking out for everyone's safety. He would have loved that.

The design of the character was modelled on an actual photo of him, (hair colour, face shape).

# CURRENT ISSUES ON OUR ROADS

What needs to change?

## "STOP ACCIDENTS BEFORE THEY STOP YOU"

Our roads are extremely dangerous in general, not to mention the fact that **seventy five people** have died on Victoria's roads, just this year (August, 2020). This is higher than the **five year average** of 68 people per year.

Statistics from the **Department of Infrastructure and Regional Development** show that during 2015 there were 1205 road deaths across Australia. In 2016 that number increased to 1300 lives lost, an increase of nearly 8% on the previous year. **160 people** in 2019 alone died as pedestrians in the entirety of Australia.

**We CAN do better. We MUST do better.**

# What can we do to change these issues?

## ROAD SAFETY TIPS

### Stop Look Listen Think

Making sure you look both ways before you cross. If there is on coming traffic do not risk it. Think smart. Look both ways, if you feel unsafe about crossing, follow your instincts and be alert.

### ALWAYS USE PEDESTRIAN CROSSING

The safest place to cross the road, is at pedestrian crossings. Don't risk crossing on the red man and always look both ways even when its a green crossing man!

### BE AWARE OF YOUR SURROUNDINGS

When crossing a road, or in a car it's so important to be aware of your surroundings. Sometimes we forget things like stopping and looking so its just as important when you're in a car to notice your surroundings.
