7 Tips to help with Year 10 Subject Selection

It IS confusing, you're not alone

Year 10 is an exciting time, but with it comes some big decisions.

Staying on to complete your high school certificate? Great news. Now you'll have the freedom to choose which subjects you'd like to study in Years 11 & 12. The pressure might feel huge.

Take a breath, it's ok if you don't know what career you want yet – you still have plenty of time to decide and plan for your post school options and pathways. We've put together some tips to bear in mind, they could help you with your Year 10 subject selections.

Taking the next step

Your schools and careers advisors will help you out, they'll guide you through the process and can give you great advice. Ultimately though, it's your decision.

Here are our top 7 Tips to help with your Year 10 Subject Selection

1. Build solid foundations

What do we mean? Well, no matter what you do after high school, there are some fundamental skills you're going to need like communication, writing, resilience, critical thinking and problem-solving to name a few.

Working hard at school now and choosing a cross section of subjects could ensure that you'll have better developed skills across the board when you leave Year 12.

2. English is important

Yep if you'd like to be a teacher, writer or journalist then you definitely need your English to be great, but it's also important elsewhere.

Your ability to communicate can impact on every part of your life. Making a great first impression really counts, whether it's face-to-face, over the phone, in an application, email, or letter.

So the better your grip on the English language, the easier your path to success could be.

3. So is Maths

It's hard to imagine when you're struggling over an algebra equation in the classroom how you're ever going to need strong maths skills after school. But you will.

Studying maths could help you develop logical reasoning, analytical and interpretive skills. Maths will also be important in most areas of your life from cooking, banking, and budgeting, to saving for holidays.

Science and Finance based jobs are clearly going to require strong maths skills, but the reality is that decent maths abilities will benefit you in most jobs.

Maths plays an important part in other school subjects including science, social studies, and even music and art.

4. Create opportunities

If you love Science in Year 10 and you only do STEM courses in Year 11 & 12, you might be narrowing down your options for courses you can take at uni. Which is no bad thing, unless you have a change of heart about your career prospects.

Choosing a broad range of subjects could help you cover more bases, giving you more options to pursue at the end of Year 12.

5. Find out what you're capable of

Tempted to take the easy options that'll mean the least number of exams, assignments or just plain thinking? Maybe you're hoping that you'll do better if you take easier subjects and boost your ATAR? Please don't.

- For a start there's **no guarantee** that you'll get a better ATAR
- You'll be limiting yourself both in the courses you'll be eligible to apply for after high school, and in what you think you're capable of achieving
- You won't develop those useful skills we mentioned earlier like problem solving, critical thinking and resilience if you always take the easiest route
- If you're not challenging yourself at school you'll be bored, time will drag on and you could even be less motivated and end up achieving less.

Ultimately you might just be cheating yourself.

6. Do what you love

It's important that you enjoy school, pursue your hobbies – who's to say you won't go on to have a career in those areas, and have a good balance of work and fun in life.

Take subject selection seriously, but don't discount art, music, or sport because you think you "should" be doing something others might consider more valuable.

7. Keep an open mind

For most of us it's hard to predict what we'll be doing in 12 months, let alone 5 or 10 years from now.

Try new things, apply yourself, leave yourself open to more options down the track and you could be rewarded with more choice and greater opportunities.

Most importantly do your research, there'll always be different pathways to get where you want to be, you never know what you'll discover along the way.

Need more information to help with Year 10 subject selection?

Have a look at some of the resources on offer, they might help you with your decision making and offer a bit of reassurance about the options you'd really like to choose.

Help Stop Cyberbullying

Did you know that up to 1 in 5 young people have experienced cyberbullying?

If you or your friends have been bullied online, there are resources out there to help.

Take a look at the Queensland Government's Stop Cyberbullying website to find out more about what cyberbullying is, how to stop it, and where you can get help.

Find out more here: <https://www.csyw.qld.gov.au/campaign/stop-cyberbullying/children-young-people>

CQUni | What's the difference between high school and uni?

Are you wondering what the big differences are between high school and uni? CQUni has compiled a short video to help you understand what the differences are and what's the most important thing to remember when transitioning from a high school student to a university student. Watch the video or visit the FAQs to find out what's the difference between high school and uni.

Still have questions about CQUni? Make sure you keep in touch to receive more information from CQUniversity, or Book a Conversation with one of their dedicated team.

Find out more – <https://www.cqu.edu.au/courses/future-students/future-study-options/high-school-to-uni/year-12-uni-toolkit>

MHFA Future Leaders Program

Applications to the Mental Health Foundation Australia's Future Leaders Program are open.

Applications are open nation-wide to all members of the community aged between 12 and 19 years who are passionate about youth mental health.

In your role as a Future Leader, you will have the opportunity to identify and discuss key issues affecting young people in mental health and contribute ideas for youth programs.

Find out more and apply here: <https://www.mhfa.org.au/CMS/future-leaders-program>

How Parents Can Help their Year 12 Students

Do you have a child currently in Year 12? This year has presented students with many challenges.

If your student is feeling lost, confused, or unsure about the future, there are ways you can help.

Raising Teenagers has written an article with some tips on how you can support your child through these tough times.

Take a look here: <http://www.raisingteenagers.com.au/what-the-final-class-of-2020-needs-from-you-right-now/>

Job Spotlight

How to become an Interpreter

What do Interpreters do?

Interpreters understand and translate text or speech into a different language. Often, they work in real time, providing instantaneous translation between parties. They can work in settings such as business, legal, and community.

If you have great communication skills, speak another language fluently and have a passion for helping people, this could be the perfect job for you.

About you:

- Excellent language skills with extensive vocabulary
- Good communication and people skills
- Emotional intelligence, resilience, and strong cultural awareness

The job:

- Determine the needs of clients
- Provide translations (spoken and written) between parties, using appropriate language for each setting (e.g. courts, hospitals, schools, workplaces and conferences)
- Remain professional and impartial, ensure that clients are satisfied with the outcomes

Interpreter salary (average) \$49,718 per year

(Source: payscale.com)

Job growth as an Interpreter is moderate (source: Joboutlook.gov.au)

Being able to speak, listen and write fluently in your chosen language is very important. For example, if you want to be a Chinese interpreter, you would be expected to be able to speak at a conversational level and confidently read text.

How to become an Interpreter in Australia

If you aren't fluent in a foreign language, completing a VET or university qualification is a preferred pathway to learn.

Step 1 – Study English and your language of interest at school and get good grades.

Step 2 – Study a relevant degree at university, or get a VET qualification, such as:

- [WSU's Bachelor of Arts \(Interpreting and Translation\)](#)
- [Monash's Bachelor of Global Studies](#)
- [The University of Adelaide's Bachelor of Languages](#)
- [TAFE NSW's Diploma of Interpreting](#)
- [ACU's Diploma in Languages](#)

Step 3 – Immerse yourself in the culture of your chosen language, either through work experience or by travel, to deepen your understanding of the language and culture.

Step 4 – Become certified through an organisation such as the [National Accreditation Authority for Interpreters and Translators \(NAATI\)](#).

Step 5 – Upskill with short courses and continued professional development.

Find out more here –

- <https://www.naati.com.au/>
- <https://ausit.org/>

Similar Careers to Interpreter

Auslan Interpreter

Translator

Languages Teacher

Linguist

Find out more about [alternative careers](#).

Frequently Asked Questions (FAQs)

- **How long does it take to become an Interpreter?**

It could take between 4 and 5 years from finishing school to become an Interpreter if you need to obtain a relevant qualification and learn a language fluently. If you speak more than one language fluently, you could start working sooner. It could still be worth considering completing a qualification; it will look great on job applications.

- **Where do Interpreters work?**

Interpreters can work in-house for a business, as part of the media, in the community, or freelance.

- **Do I need to go to university to become an Interpreter?**

Having a formal qualification can greatly improve your chances of finding work. VET qualifications are often sufficient and could take less time to complete.

- **Is Interpreter a good career to aim for?**

If you have a passion for helping people and love learning different languages, a career as an Interpreter could be ideal for you.
