

FOUNDATION

Literacy & Numeracy Update

Students are exploring a range of Fairy Tales and Fables! They are retelling the events in stories such as King Midas and the Golden Touch. Students have been describing the parts of numbers between 20-99. For example, the number 42 has 4 tens and 2 ones.

We had a great day celebrating 100 Days of School and were so impressed by the efforts of students and their families to dress up! Thank you to all involved!

Upcoming Focus

Over the next week, students will be learning the digraph sound /sh/ and explore the story Little Red Riding Hood. In Numeracy they will explore measurement, comparing the length, mass and capacity of different objects!

Skill in Focus

Fluency is the ability to read accurately and with expression. In class, we have been exploring strategies to help us read as we would speak. This has included re-reading the same text throughout the week and exploring features of a text such as speech bubbles.
