

Religion Task 1. Creation task

Creation is when God made the trees, soil, bats, birds, lions, tigers, mammals and reptiles. Most importantly, he created us to keep the earth safe and sustainable. He made the trees to clean the air and to keep us alive. The cold makes us not want to get out of bed in the morning, because we want to be warm and the sun and the rain feeds our crops. Pollution is how we don't care for it such as, burning fossil fuels and polluting our water. Having sustainable farms such as organic farming and regenerative agriculture is how we care for our planet.
