

April 2023

GLENLYON DRIVE, ASHGROVE PROJECT

Greener Suburbs

WHAT WORKS ARE COMING UP?

Brisbane City Council will soon start works to protect and enhance the local heritage listed Bunya Pines and other significant trees on Glenlyon Drive.

WHEN WILL THIS WORK TAKE PLACE?

Start	Late April 2023
Finish	August 2023, weather and site conditions permitting
Time and day	7am to 4pm, Monday to Friday

WHAT DOES THIS WORK INCLUDE?

Works will include:

- improving and expanding existing garden beds
- formalising garden beds with sub-tropical plants
- improving driveway connections to protect tree root systems
- installing bollards for pedestrian and road safety
- installing porous paving and pedestrian ramps

WHAT DOES THIS MEAN FOR ME?

Temporary traffic changes will be required to allow work to be completed and motorists should expect delays when travelling through the area.

One lane on Glenlyon Drive will be closed at the start of construction, from 7am and opened again after 4pm each day.

At times, footpaths and driveways will be temporarily restricted to complete these works, however access to properties will be maintained.

Council will provide advance notification for any access changes and out-of-hours works during the construction period.

You can view the planned detour route over the page or via the QR code.

The work zone will alternate sides as works progress.

Local residents may also notice an increase in noise and vehicles movements during the works.

Council will continue to keep you updated through signage in your local area.

We value your patience and cooperation while we undertake this important project.

WHAT IS THE GREENER SUBURBS PROGRAM?

Council's Greener Suburbs program is a series of projects that aim to improve the clean, green feel of locations across Brisbane, through increase tree planting and landscaping.

Planting and maintaining street and park trees ensure Council is caring for our urban forest and that residents receive all the benefits trees bring to our city – including cooler, greener, more comfortable pathways for walking and cycling, improved air quality, and shelter for our wildlife.
