

## EXPRESSION OF INTEREST

# JOIN OUR 10-WEEK CODING PROGRAM AT SKILL SAMURAI ELSTERNWICK

Dear Parents of Ripponlea Primary School Students,

We are delighted to extend an exclusive invitation for your child to participate in our 10-week self-paced coding program at Skill Samurai Elsternwick. Designed to ignite a passion for coding, this program offers a comprehensive introduction to block-based coding for beginners and an exciting exploration of Python programming for intermediate learners.

At Skill Samurai, we recognize the significance of equipping students with essential coding skills in today's digital era. Our dedicated instructors are committed to providing an engaging learning environment that fosters creativity, problem-solving abilities, and critical thinking.

Throughout the 10-week program, your child will:

1. Learn the fundamentals of block-based coding (for beginners).
2. Explore the versatile Python programming language (for intermediate students).
3. Engage in hands-on coding projects, challenges, and activities.
4. Develop valuable problem-solving and logical thinking skills.

At the end of each session, students will have the exciting opportunity to collaborate on STEM-based challenges. These challenges will put their creativity and cooperation skills to the test, offering them a chance to win amazing prizes and showcase their talents.

We are thrilled to offer this transformative learning experience at the exclusive price of \$20.00 per session (normally \$44.95 per session) for students from Ripponlea PS. The program will commence the first week of term 3 on Tuesday 11th July at 4:00pm and continue each week with the final session being Tuesday 12th September.

As spaces are limited, we encourage you to register your interest promptly. Please register your interest with the school's business manager - Kate by Friday 16th June. Minimum numbers are required for the program to run.

Unlock the world of coding for your child and equip them with essential skills for the digital age. Join us at Skill Samurai Elsternwick for an unforgettable 10-week coding journey filled with STEM challenges and the opportunity to win fantastic prizes!

Kind Regards,

Jacob Gross
