

Melbourne city fc reflection

By Maddie 6H

This term, I enjoyed learning soccer and robotics with Melbourne City FC this term. In Soccer, I learnt how to work with others and lots of soccer skills. It was fun when we got to play European handball and Numerical Soccer. I learnt a lot of new games during the term. In robotics, I had fun when we got to make an obstacle course and guide our robot through. We named our robot Bob, and we gave him glasses made of rainbow wire. We also make a flag out of a straw and some paper. My favourite part was the world cup, and although we have not finished it yet, it was especially fun. (Please note that this was typed before the last session, so I do not know who has won yet.) Overall, this was an amazing experience, and I am glad I got to see it.
