

The court

Mr Fox needs to feed, protect and live for his family.

Imagine not being able to feed your family and get them to drink. So how else will Mr Fox feed his family? Mr Fox will need to 'Borrow' the farmer's resources. The farmers can just replace them. It's a matter of survival.

The Farmers have sheds full of food including plenty of apples, turkeys and chickens. Do the farmers need that many resources? No, they don't. They are greedy, self-absorbed and mean.

I believe the farmers are having fun picking on the fox family. They have saved enough food for ages. So they won't miss a chicken or two. They are hunting the family so we must stop them.

**Eight out of nine people in this class agree Mr
Fox's family should be left alone.**

**So let them take some resources for the future of
their family!**
