

ENGAGING AFTER SCHOOL WORKSHOPS

Each hour-long class is a fun and educational LEGO-building adventure with Bricks 4 Kidz. We use age appropriate models for different levels of building skill.

This hands-on class explores STEAM concepts (Science, Technology, Engineering, Art, and Math) primarily using LEGO Bricks, in which children will develop problem-solving and critical-thinking skills in a fun and engaging way. Even our youngest and newest students will learn how to make mechanical LEGO models that move and groove.

As they advance in building skill, they'll also motorise their weekly model for even more learning fun!

Term 1 - Energy is Everywhere

In Term One our theme will be Energy is Everywhere

We will explore the energy released from different forces of nature, as well as the effects it has. Students will begin to visualise how these natural phenomena take place and where they get their energy from.
