Touch Typing Skills

Could your son benefit from touch typing skills for a wide variety of his writing and communication needs at school and beyond?

Designed and run by an experienced occupational therapist, this program has been developed to give students the touch typing skills they need to undertake **effective word processing** on their PLDs, in a way that **develops good and sustainable typing habits, encourages improved desk ergonomics, and improved typing speed and accuracy.**

It is open to all students in the school from Years 5 to 10

The Program will include activities to:

- Develop fine motor skills which underpin good typing
- Look at overall posture and ergonomic workstation set up
- Teach how to touch type, using a popular and easy-to-learn system
- Focus on typing technique and tips to improve speed and accuracy
- Give incentives to make practice manageable and fun

The program will be run on a small group basis so that professional guidance, peer feedback and modelling can be maximised, with students attending one afternoon per week for 8 weeks.

The program will run over 8 consecutive weeks from Week 2 of Term 3 2017 (week beginning 24th July 2017) to the week of 11th September 2017, with a makeup week offered in the last week of term if required.

Time: 3.20pm – 4.30pm (various afternoons available depending on demand)

Location: Leary Room 2 Block D St Pius X College

Cost: \$320.00 per student

You may be able to claim on your Private Health Insurance cover for this program if your policy includes OT under extras cover – item Number 300 Group therapy intervention.
