

STAYING CONNECTED WITH ONLINE LEARNING PLATFORMS AT HOME

Verso Digital Classroom

At Para Vista Primary School all classes are moving forward with digital classrooms to support students learning from home in Term 2. We are using a website called **VERSO** - www.versolearning.com as the platform to digitally deliver your child's learning. Teachers will upload lessons for students to engage with and respond to in a range of ways. Verso provides for consistency in rigorous learning Preschool to year 7.

How does my child log into VERSO?

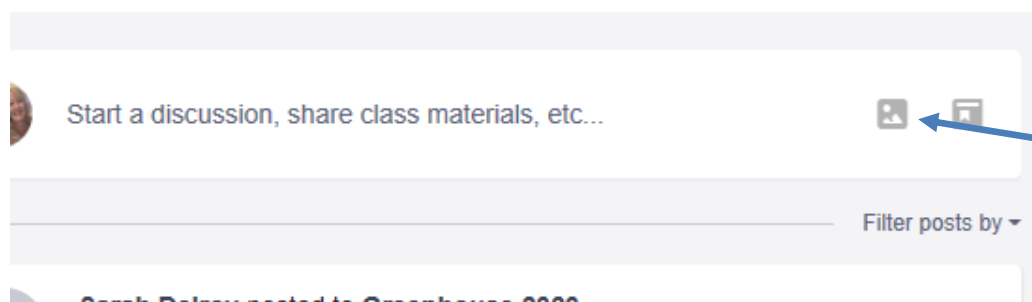

Username: For the majority of Para Vista Students, the username is your child's first name followed by the first letter of their surname. e.g. *John Smith's username would be: johns*

(Alternatively if they have used this username on previous school platforms then they would need to use first name followed by the first two letters of their surname. e.g. johnsm)

Password: your child's birth date. e.g. if D.O.B is 5th Jan 2004 – password is: 050104

Edmodo

Para Vista Primary School's main form of digital communication is Edmodo. Please ensure that you are connected through your child's classroom portal. If you are not sure please send a message to your child's teacher on Edmodo to confirm your connection. This platform will be used to send through fortnightly learning plans and for you to send back weekly feedback. In your Parent Pack you have a feedback form to complete for each week. Please upload a photo of it to message back to the class teacher.
