Outward Bound Leadership Program

Organisation: Outward Bound

Location: Tharwa, ACT

Date: July 7 to July 11, 2025

A chance for young adults ages 16 to 24 years to discover their leadership skills and strengths. Meet like-minded connections and add a highlight experience to your resume.

By using the outdoors as your teacher, the Outward Bound Leadership program will lead you through the Australian bush on a journey of self-improvement. Develop your abilities as a leader and strengthen trusted skills on how to best apply yourself in all your future endeavours. You'll find you're much more capable than what you thought.

Your group will need to work together while organising camp, cooking on fires, navigating through the wilderness, and summiting peaks. The individual challenges such as high ropes and abseil are supported by your two Outward Bound facilitators, who will expertly explore and discuss how to apply these experiences to your life back home.

Outward Bound Leadership can be attended to complete the Duke of Edinburgh's International Award: Gold Residential Project.

2026 National Youth Science Forum Year 12 Program

Organisation: National Youth Science Forum

Location: ANU Acton Campus & UQ St Lucia Campus

Date: January 6 to January 21, 2026

Are you in Year 11 in 2025? Apply now to join us in January!

The National Youth Science Forum (NYSF) Year 12 Program gives students that are about to start Year 12 a broader understanding of study and career options available in science, technology, engineering and mathematics (STEM).

Staying on campus at university colleges, students are immersed in science and technology.

Participants:

- participate in tours of science and technology facilities,
- learn about cutting-edge research,
- engage with industry partners and research providers,
- learn about university, training and STEM career pathways,
- mix with like-minded students their age from all over Australia,
- participate in social and team building activities, and
- network with former NYSF participants.

In January 2026, the NYSF Year 12 Program will run two summer sessions at:

- The Australian National University, Canberra (6 –14 January 2026)
- The University of Queensland, Brisbane (13 – 21 January 2026)

As part of the application process, any students experiencing financial hardship or another disadvantage that negatively impacts their ability to attend the program may apply for an [NYSF Access and Equity Scholarship](#).

We also encourage students to seek financial support from NYSF's founding partner, Rotary. Many Rotary Clubs are familiar with the NYSF and able to offer some level of funding or assist students to fundraise to attend. You can use the [Rotary Club Finder](#) to search for your local Club.

Applications close 20 June 2025. You will be advised of the outcome of your application by mid-August.

[High school subject selection – A guide for parents](#)

Watching your child navigate subject selection can be both exciting and challenging. This pivotal moment in their academic journey carries real weight, even for students who feel confident about their future plans. As a parent or carer, your most valuable role is to provide support while they work through options to make decisions that truly fit them.

Why Subject Selection matters

Throughout most of middle and high school, your child has been building learning foundations across diverse learning areas. Now, they're approaching an important transition and the opportunity to specialise in and explore subjects they're interested in on a deeper level.

This shift from broad education to focused study helps prepare them for future pathways while giving them agency in their learning journey.

7 ways parents can support their child's Subject Selection

We've pulled together our top tips for supporting your child so they can make the best possible choices.

Empower their decision-making

Although it's hard to see them struggle or make mistakes (or what we can perceive as mistakes), your role is to guide and support, not to choose for them. Help them think through their options, but remember that ownership of the final decision builds confidence and commitment.

Understand prerequisites and their limitations

If your child is considering university, have them research prerequisites for courses they're interested in. Even when specific prerequisites aren't listed, understanding the assumed knowledge for university programs could help them prepare effectively - not only could they be more likely to receive an offer, but it will also help them to keep up once they start the course.

Be cautious about selecting subjects solely to meet prerequisites if they genuinely dislike the content. This approach typically leads to reduced engagement in high school and could set them on a path toward career choices that don't align with their interests or strengths.

Focus on strengths and keep options open

Year 10 students aren't known for their rational decision-making skills, and 45% don't have a clear career aspiration ([Yu & Warren, 2019](#)). This is where you can guide them and help them stay on track.

Here are a few examples of some *less-than-ideal* decision making when it comes to subject selection:

- Choosing subjects they think will scale better or are “easier” in the hopes that might help them to get a better ATAR
- Selecting subjects they think will look better on their resumes
- Avoiding subjects they enjoy because they think they're too easy or aren't linked to a career path that's been visible to them

Instead, encourage them to lean into their strengths and consider subjects that they enjoy, they're interested in, and that they're really good at. Assessment results and teacher feedback can both provide objective insights into where they excel and help encourage this approach.

“Choose the enabling subjects, the ones that will keep the doors of opportunity open...”

[Dr Alan Finkel](#), Australian Chief Scientist 2016-2020

Utilise school resources

Direct communication between students, parents, and school staff can significantly simplify the subject selection process. Book appointments with Career Practitioners or Guidance Officers and attend information sessions to access expert advice and support.

Consider local employment realities

Research the local job market to help your child develop realistic expectations. Sometimes students think that if they study certain subjects at school and uni, they'll be able to enter their chosen career straight away. Which might be true for certain cases, but it's also heavily dependent on where they'll be living and what opportunities are available locally.

If opportunities in their preferred field are limited locally but they're really enthusiastic about a specific career, expand your research to nearby regions or broader geographic areas.

Rather than discouraging them from taking subjects they're passionate about, help them identify all the career paths and opportunities where their skills, strengths, values and qualifications could be valuable.

Chat frequently

Conversations with your child are always the best way to find out where their heads are and what their struggles might be. Whether it's micro-conversations in the car or long chats over dinner, talking openly and honestly can be incredibly valuable and help your teen feel reassured in their decisions.

Provide balanced support

Your role in subject selection involves both encouraging their interests and asking questions that help your child to consider practical implications. This balanced approach could help them make decisions they can commit to with confidence.

Find out more

If you're looking for other resources, we've published a [workbook](#) (the updated version for 2025 will be available soon) to help high school students to scaffold their thinking processes and work out what they're good at and what they enjoy. If your child's school is a Study Work Grow member, they can access the workbook for free as part of their membership - they just need to ask their Careers Advisor.

Or you can read more information about subject selection on our website [here](#), or learn more about diverse careers [on this page](#) or in the [job spotlights section](#).

Work Experience

5 work experience ideas for students who love music

Are you a high school student who lives and breathes music? Whether you're jamming with friends or creating playlists that perfectly capture every mood, your passion could become more than just a hobby. Work experience in the music industry can give you valuable insights into potential career paths while letting you explore what you love.

Here are five exciting music industry work experience ideas that could help you turn your passion into future opportunities.

Music studio assistant

Local recording studios are often looking for enthusiastic young people to help out. As a studio assistant, you might:

- Help set up equipment for recording sessions
- Observe professional sound engineers at work
- Learn the basics of recording software
- Assist with organising studio schedules

Reach out to local music studios or recording facilities and express your interest in work experience. Don't be afraid to contact smaller studios either - they're often more open to having high school students help out.

Music event planning

Connecting with event organisers or music festivals in your area can give you a chance to help with tasks like scheduling, logistics coordination, or promotional activities. This experience could involve:

- Helping coordinate performers and stage schedules
- Setting up equipment and spaces
- Assisting with promotion on social media
- Learning about event safety and management

This behind-the-scenes look shows you how much planning goes into the concerts and festivals you love attending.

Music journalism and blogging

Consider reaching out to music magazines, websites, or blogs to propose contributing articles or reviews about local bands, concerts, or music trends. This experience helps you:

- Develop writing and communication skills
- Build a portfolio of published work

- Connect with artists and industry professionals
- Stay up-to-date with the local music scene

Many online publications are happy to have young contributors who bring fresh perspectives on new music and artists - but don't forget about smaller local publishers as well.

Instrument repair and maintenance

Working with skilled technicians at music stores or repair workshops can teach you valuable skills in instrument care and maintenance. You might learn:

- Basic repair techniques for different instruments
- How to properly clean and maintain equipment
- The differences between instrument brands and models
- Customer service skills when dealing with musicians

This practical knowledge is incredibly useful if you're a musician yourself or interested in the technical side of music. Reach out to local retailers or repair shops and see if they have room to take you on. The experience could even lead to a part-time or casual work opportunity.

Music education

This experience not only strengthens your own musical knowledge but could spark an interest in teaching or music therapy careers. Your tasks might range from setting up instruments to helping students during practice sessions. You could:

- Help younger students with basic instrument skills
- Assist music teachers during group lessons
- Organise sheet music and learning materials
- Help with school concerts or performances

Local schools or private music academies often welcome assistance with their music programs.

Finding opportunities

When looking for music industry work experience:

- Start with your own connections - your school music teacher might have industry contacts
- Research local businesses and reach out directly with a polite email or phone call
- Check if your school has an existing work experience program with music industry partners
- Follow local music venues and studios on social media for volunteer opportunities
- Be prepared to start with simple tasks to prove your reliability

Remember to approach potential placements with enthusiasm, professionalism, and a willingness to learn - your positive attitude could leave a lasting impression.

Health & Wellbeing

[3 tips to find life balance as a student](#)

Life is a balancing act, and students need to become master acrobats in order to navigate their menagerie of tasks and roles. Between school, study, work, chores, family, friends, and maintaining a social life, there's a lot to keep track of each week. If you're feeling like you don't have enough hours in the week to get things done, we have some tips to help you find life balance.

What happens when you're not in balance?

It's easy to fall out of balance – most working adults in only get [around 15 hours](#) of leisure (or non-work) time each day, including sleep. So once we take out the recommended 8 hours we should be

snoozing each night, that only leaves 7 hours for everything else. If you want to see how you compare, [check out this article from the ABC](#).

Lots of people write-off life balance as a luxury or a made up fad. But having good balance in your life can not only make you happier and healthier, but also help you accomplish more in the long run. The impacts of lack of balance in your life could include:

- [Burnout](#)
- Loss of motivation
- Lack of 'thinking' time
- Mental health issues
- Physical health issues

Signs you could be out of balance

If you generally feel happy, healthy, and well-rested, then you're probably already doing a pretty great job at the whole balance thing. Of course, there are always times when you don't feel great, like when exams are coming up, you're working extra shifts to earn more cash, or if you're sick – that's normal.

If you often feel tired, low, or that every day is a struggle, then it could be time to reassess your priorities and manage your time a bit better. If you don't feel like the problem is going away, or if you have any concerns about your mental health, then please see a professional.

Here are a few things to look out for:

- You wake up tired
- You find it hard to get to sleep
- You often get sick
- You're missing your friends/family/hobbies
- You no longer enjoy school or study
- You often feel anxious, stressed, or miserable
- Boredom is an issue for you

Life balance tips for students

There's no "one-size-fits-all" solution to finding balance in your life. The amount we need to work, rest, and play depends on how you operate – in other words, you need to find the right balance for you, not what you think you're supposed to be doing.

If you're not feeling in balance, here's what we recommend you do:

Work out where you are

Make a list of what needs to get done (think school, sleep, or chores) and what you would like to get done (think playing games, exercise, or volunteering). For example, you might include:

- Sleep
- School
- Chores
- Homework and other study
- Work or volunteering
- Extra-curricular commitments
- Hobbies
- Social time
- Life admin
- Time spent on your phone or other device

You don't have to go into that much detail, but the more you work out, the more wiggle room you might find. Then think about the number of hours you spend doing these things and jot them down.

Work out where you want to be

Once you've worked out how you're spending your time, the next step is to think about how you would like your week to look.

We all have 168 hours in a week. If you sleep the recommended 8 hours a day, go to school from 9am to 3pm 5 days a week, travel an hour for school (there and back), allow an hour for eating, and spend an hour for other life admin each day, that leaves you with **63 hours** a week to spare. This number is just an estimate – work out your number then use that for the rest of the calculations.

Now you need to work out what your priorities are. Go back to the list you made in step 1 and add up the things you both need and want to do each week. If you get to 63 (or your number of 'spare' hours) and there are still things on the list, then you'll need to think about what matters most – so work out which activities you don't need as much and work out a way to do less of them.

If you find you have loads of free time left – great! You don't have to fill every minute or schedule every hour. But if there's a club you've been itching to join, or a skill you've been wanting to learn, perhaps now is a good time to give it a go.

Build a plan to help you get there

Once you've reached this point, congrats! That's a huge hurdle out of the way. Now you have to make the changes in order to address the balance problems and lead the life you want.

Here are some tips that could help you to achieve your end goals:

- Use a planner, calendar, diary or app to write down your new timetable. This can help you stay in-check and create new habits instead of slipping back into your old routine.
- [Set goals](#) and then break them down into manageable milestones.
- Incorporate time limits into your schedule. If you want to play games or spend time social media, you don't need to cut them out completely - just set an alarm to remind you it's time to hop off. Got lots of study to do? Set a timer, and if you haven't finished in the allocated time, reassess your study patterns and habits, or consider asking for help.
- Speak to your family. If there's high expectations of you at home, working out exactly what needs to be done and figuring out a schedule could really help.
- Work out which activities on your list you can get rid of on a daily or weekly basis. If you volunteer but it's taking up too much time, ask if you can help out on a more casual basis. If you're doing lots of extra-curricular stuff, is it time to drop something for a bit?
- Be flexible – some days or weeks you might have less school work or other commitments, or some days you might just feel more exhausted, so it's always OK to change your schedule around.
- Take breaks when you need them. You should never feel guilty about resting and looking after your body.
- Unplug from social media and other screens from time to time (after a little while, you seriously won't miss it).
- Practice mindfulness, which includes being grateful, being present, helping out around home or with friends, or spend more time making better connections with people who make you feel good.
- Try to stay active. You don't need to take up marathon running, but even going for a quick walk each day can do a world of good for your health.
- Learn to say "no" (nicely).
- Ask for help if you need it.

Getting balance in your life is well worth it and is a great skill to use throughout life.

University

Open days: Your ultimate guide to campus visits

Pondering life after high school can feel overwhelming, but in your quest to make the best decision for you, there's one opportunity you definitely shouldn't miss: [open days](#).

Whether you're thinking of heading off to university, college, or another tertiary institution, these events are your chance to explore campus life, meet current students and staff, and get a real feel for what studying at a particular institution might be like. So let's take a quick look at why they matter and how to make the most of them.

Why open days are worth your time

There's something about experiencing a university firsthand that just hits different. You know that feeling when you walk into a place and think "yep, I could belong here"? That's what you're looking for at an open day.

Open days give you direct access to the people who know the institution best. You can chat with actual students (who'll give you the unfiltered tea about what studying there is really like), professors who are passionate about their subjects, and advisors who can help you navigate everything from applications and scholarships, to course options, accommodation, clubs, and support services.

When do open days happen?

Universities [around the world](#) typically hold their open days during the months leading up to application deadlines. In the northern hemisphere, this often means spring and early summer, while in the southern hemisphere, it's usually mid-to-late winter.

Most universities plan these events well in advance and publish dates on their websites at the beginning of the year. Mark them in your calendar as soon as you know them, as sometimes you'll need to register in order to attend and the popular sessions can fill up fast.

The good news is they're completely free and there's often food, entertainment, and competitions happening - so while you might have to factor in travel costs, you could walk away better off than when you go in.

Preparing an open day action plan

The key to [getting the most out of an open day](#) is a bit of preparation. Don't stress - we're not talking about studying or anything too taxing. Just take a little time to:

Register for the event

Check out the university's website and register for the open day online. Most universities will send you a program and updates once you're registered.

Think about what matters

Have a think about what really matters to you in a university. Is it the course content? The campus vibe? Sports facilities? Support services? Internship opportunities? Everyone's different, and knowing your priorities will help you focus on what's most important to you.

Prepare your questions

Jot down any questions that you can't find answers to online. There's no point wasting your open day asking things you could have Googled, right?

Know who to go with

Also, consider who you want to bring along. Parents can be great for a second opinion, but sometimes they ask different questions than you would. Friends can make the day more fun, but might distract you from your mission. Choose wisely!

Sort out what to bring

Keep it simple - a notebook or your phone for notes, comfortable shoes (campus tours involve a lot of walking), a water bottle, and a bag for any goodies should be all you need. You might also need some funds for travel, parking, or other costs like food on the day.

Questions to ask on open day

When you're chatting with university staff and current students, here are some conversations worth having:

About courses

- Are there any prerequisites for applying or any subject knowledge I should have before starting?
- How much of this course is theoretical vs. practical hands-on learning?
- Do you offer part-time, online, or flexible study options?
- Can I customise my degree with electives I'm interested in?
- What do graduates from this program typically do after finishing?
- What are the costs for this course?
- Do you offer any work experience, placements, or networking opportunities?

About support services

- What's the support like here? Who helped you when you needed it?
- Are there services for students with specific learning needs?
- How would you be able to accommodate my needs?
- Do you offer mentoring programs, study groups, or academic support?
- Is there any financial help available if I need it?

About campus life

- What societies and/or clubs are available to join?
- What facilities and services are available on campus?
- What's the best way to get around the campus and city?
- What accommodation options do you offer?
- What's the surrounding area like and is there stuff to do off-campus?

Virtual open days

Living too far away? Dealing with a disability that makes travel difficult? Or just can't make the scheduled date? No worries - if you can't attend in person, there are often [online or virtual open days](#), webinars, and information sessions that you can sign up for instead.

Many universities now offer amazing virtual open day experiences. They can include video campus tours, live-streamed information sessions, chat functions to ask questions in real-time, or even immersive virtual reality experiences.

Even if you miss the live event, lots of universities make their session recordings available afterward, so you can catch up in your own time.

Finding open day dates and information

Here's how to stay in the loop about upcoming open days:

- Follow universities on social media
- Sign up for email updates from universities you're interested in
- Check websites that compile open day calendars ([like ours](#))
- Ask your school's careers advisor what's coming up

Pro tip: Create your own dedicated calendar or document to track open day dates for all the universities you're considering, along with details, registration information, and how to get there.

Next steps

Once you've attended each open day, it's important to take some time to reflect. Here are some things to think about to help you make your final decision and prepare for applications:

- Which campus felt most comfortable or exciting?
- Were there any new courses or career paths you discovered that you want to learn more about?
- Do you need to book a follow-up visit or conversation to clarify anything?
- Are there any upcoming application deadlines?

Remember that if you're still unsure, you can always reach out the future student teams with any follow-up questions.

Ready to go?

There's no perfect university that works for everyone. The "best" university is the one that's right for you - your goals, your learning style, and your interests.

Open days are your chance to go beyond the glossy prospectuses and Instagram-worthy campus shots to discover what universities are really like. Whether you attend in person or virtually, your future self will thank you for putting in the effort now.

Want more information on your future study options? [We have heaps more to discover on our website here.](#)

Job Spotlights

How to become a Scrum Master

Scrum masters lead teams using [Scrum](#) frameworks when working on complex projects that can change a lot during their progress. They manage communications between team members and departments, increase productivity and accountability, and remove obstacles and distractions to ensure projects stay on track and are completed on time.

If you have excellent interpersonal and communication skills, are a great problem-solver, and you're looking for a job that will be varied and challenging, then a career as a scrum master could be highly rewarding.

What skills do I need as a scrum master?

- Knowledge of Scrum theory
- Strong communicator
- Great team worker
- Effective coach & mentor
- Adaptable & organised
- Excellent problem-solver
- Creative & critical thinker
- Strong time management

What does the job involve?

- Determining project goals & timelines
- Splitting up projects into "sprints"
- Ensuring flow of information between teams
- Organising regular meetings
- Mentoring others on agile processes
- Solving problems & conflicts within teams

- Motivating team members who are stuck
- Reporting on project progress

What industries do scrum masters typically work in?

- Professional, Scientific & Technical Services
- Public Administration & Safety
- Financial & Insurance Services

What Career Cluster do scrum masters belong to?

Scrum masters are typically strong [Coordinators](#), skilled at strategic planning, leading teams, and keeping things organised.

They also share some traits with the [Informer Cluster](#), using their skills to guide and mentor other people.

What kind of lifestyle can I expect?

Scrum masters can work in lots of different industries, from retail and construction to finance and IT. Roles are generally office-based as you'll need to meet with people and be on-hand to help out at all times.

You can expect to earn an above average salary throughout your career.

There are very few part-time opportunities for scrum masters. Most of your work will be done during regular business hours, but there's a high probability you may have to work overtime to overcome problems and meet tight deadlines.

How to become a scrum master

There are no formal qualification requirements to become a scrum master, but without lots of relevant work experience and some form of recognised certification, you might find it difficult to be successful applying for these roles.

- Finish high school with English and Maths. Taking business and IT subjects may also be helpful.
- Consider completing a relevant tertiary qualification, typically in project management or business.
- Work in a business environment and gain lots of relevant experience and insight into project management.
- Complete workshops, short courses, or certified training in [Scrum frameworks](#) or [agile delivery](#).

What can I do right now to work towards this career?

If you're in high school and you'd like to find out if becoming a scrum master is right for you, here are a few things you could do right now:

- Volunteer as a mentor and get involved with any coaching and training opportunities. You'll develop your interpersonal and communication skills, as well as develop an awareness of your own mentoring style.
- Find work experience in a project management setting.
- Read up about what scrum masters do, watch videos about the processes they manage, or talk to a scrum master about what a day in their life is like.

Where can I find more information?

- [Scrum.org](#)
- [The Scrum Guide](#)
- [Scrum Alliance](#)

Similar careers to scrum master

- Project Manager
- Business Analyst
- [Financial Manager](#)
- [Business Development Manager](#)
- Data Analyst
- Software Developer
- Statistician
- Systems Analyst
