

3/4B 2D Geometry

Last week we
explored the
properties of 2D
shapes

We learned about
Triangles. We used
Isosceles
Scalene and Equilateral
triangles to make our
birds

2D Triangle Birds by
3/4 B

The image is a vibrant, abstract painting by Paul Klee. It features a complex composition of overlapping and adjacent geometric shapes, primarily squares and rectangles, in a wide array of colors including red, blue, green, yellow, brown, and purple. The background is a dark, textured brown. In the upper right quadrant, there is a large, textured orange circle. The overall style is characteristic of Klee's 'Zoo' series, which uses simple forms to represent various animals. The painting has a rich, textured appearance, suggesting it might be made of wood or canvas with thick paint application.

We used Paul Klee's art as our
inspiration for exploring 2D plane
shapes
