

TARNEIT P-9 COLLEGE

Dear Parents and Carers,

As our Year 8 and 9 students have continued their remote and flexible learning, students have recently completed a range of assessment tasks across all subjects. In English, students in Year 8 are coming to the end of a unit of work on advertisement – its purpose, uses and impact on audiences. Students in Year 9 are currently completing their unit of work on persuasive writing – identifying and analysing persuasive writing and writing their own pieces using persuasive language.

In Mathematics, students in Year 8 have completed their measurement unit on congruence and have moved on to data. This has allowed students to explore different ways to collect data while learning remotely. In Year 9, students have just completed their assessment piece on measurement where they were asked to design a 3D layout of their bedroom and calculate features such as volume and surface area. (Please see image below of a student's floorplan)

We encourage all students and parents to remain active and spend at least 30 minutes completing some physical activity each day.

To all our year 9 parents, a reminder to parents that the preference form must be returned via email to enrolments@tarneitcollege.vic.edu.au no later than Friday 29 May.

We look forward to seeing you all very soon.

Kind Regards,

John Eskander,
Assistant Principal, Years 8-9
