

Sea Lions

What do they eat?

Sea lions eat fish, squid and lots of meat. They are predators but sharks and whales love to eat them.

Weight

They can weigh up to 1,000 pounds. Boy Sea Lions are bigger than girl sea lions.

Water

*They can breathe under water for up to 20 to 30 minutes.
They can swim really fast because of their body shape. They are shaped like a torpedo!*

Where do Sea Lions live?

Sea lions live on most coasts but not the Atlantic ocean and beaches. They can only live on land but can breathe under water. Sea lions live beside rocky beaches or sandy coastlines.

Interesting facts

Sea lions can stay underwater for 20 to 30 minutes.

They are mammals. In the zoo they live to 30 years old but in the wild not as long. Did you know there are 6 different species in the world?
