

# Melbourne City Reflection

I liked how we get to have games of soccer and get to build our very own robot!

I disliked how I came last in the world cup 😞.

I learnt how to play European handball.

I had fun when building the robots and playing soccer.

I would've like to have seen playing more sports.

After playing soccer, it made me feel happy, awake and energetic.

My favourite part is coding, building and having fun. 😊
