

# Fires and the Drought

by Jessica

This year has been very ~~toaff~~ hard because we are not getting any rain with has caused the worst drought ever recorded. Also it has made spring and summer hard for the fire. #

It is only spring (it makes me feel scared to see what is going to happen in summer) and there are around 71 fires in NSW. On Thursday there was a fire that start near Wandsworth. It was also around 9km away from my house. On thursday afternoon I went to Courtney's house so my parents ~~and~~ didn't have to worry about ~~my~~ me and so I didn't have to think about home and get distracted at school. Sadly on friday night the fire hit my place. If Dad didn't put the sprinkle on the roof the house would have been on the ground. The woolshed was burnt to the ground, the trees got burnt, a lot of dust, ashes, smoke inside, a bit of the walls were burned and so were the dog kennels. But I said to myself that wen it rains the yard will be very green.

This year been hard with the drought. Sheep dying.

cattle dying, feeding sheep, feeding & cattle, creaking  
sheep & cattle. Usually dad starts at 6am and finishes  
at 12pm, which makes no time to do other  
jobs. Water is another big issue, making sure  
animals have water if we have water and the  
trying to use as little as possible.

I am very worried about dad he worried  
about water the animals and the house.  
It feels like a box and there is no way  
out of the box. I also think that dad  
giving up to.
