Career in Project Management

There are so many similar definitions or statements of what a project manager does, and one useful website* states that project managers *ensure the project is completed on time and within budget, that the project's objectives are met and that everyone else is doing their job properly. Projects are usually separate to usual day-to-day business activities and require a group of people to work together to achieve a set of specific objectives. Project managers oversee the project to ensure the desired result is achieved, the most efficient resources are used and the different interests involved are satisfied.* The website goes on to mention the typical industries project managers work or are employed in – construction companies, architects, software producers, commercial retailers, engineering firms, manufacturers, public sector organisations and aviation.

There are a number of universities in Victoria that offer courses focused on equipping students with a qualification or specialisation in project management, and a variety of these courses include –
