

## Classroom Moments 5E

We are growing in confidence with our learning during Term 3. In Maths, we have been developing a repertoire of number facts and learning to split whole numbers equally into two parts. We learned to use mathematical vocabulary like 'same', 'share' and 'plus'.

In Language, we have been reading nursery rhymes and learning to identify the who and what of a story. We have also been learning to retell stories in sequential order, including the beginning, middle and end. During handwriting, we have been developing better letter formation and strengthening our writing muscles by practising writing 'upside down'. The highlight of the term was our swimming week at Big Fish Little Fish Swimming Pool. We learned to cooperate with each other during water games, transition between the pool and school, and wear a life vest as part of our learning about water safety.
