

## Girls Should be paid the same as boys at work.

Girls are just as strong as boys. Strong is not just about looking strong. Girls and boys are both people and they should be paid the same. Girls work as hard as boys.

Girls train and work just as hard as boys. Boys can be physically strong, but strength is more than big muscles. It's also about mind set. It means if you're determined, and focussed you have a healthy mind set.

The average full-time weekly pay for girls is 15.3% less than boys. That is wrong because they are people, just like kids, and boys and they should be paid the same.

Girls spend so much time working at work, plus at home for their family and kids. They cook, clean, help and so much more.

These three reasons are the reason I think girls should be paid the same as boys.
