Wastewater Testing Explainer

The government regularly tests wastewater from almost 200 locations across Victoria to look for any traces of COVID-19 in the community.

This testing helps the government keep the community safe by identifying the virus through early detection.

Exposure Sites and Tiers Explainer

An exposure site is a place that someone with COVID-19 visited.

If you visited the place at the same time, it means you were very close to someone who had COVID-19.

Exposure sites have three different tiers, which means levels.

Available online at:

<https://soundcloud.com/user-760283919/sets/exposure-site-explainer-tier>
