

## How to Make a Pine Cone Bird Feeder

### Supplies:

- Pinecones
- Small bowl of peanut butter or jam
- Bird seed
- Plastic spoon, popsicle stick, or spatula
- Paper plate

### Directions:

1. Place the pinecone on a paper plate
2. Tie a string at the top of the pinecone.
3. Using a plastic spoon or spatula, spread the peanut butter or jam around the pine cone. Try to cover as much of the pinecone as you can with a thin layer.
4. Once the pine cone is covered, roll the pinecone around in the bird seed until the cone is covered with the seed.
5. Using the string hang the pinecone from a tree in your yard.
6. Sit back and wait for the birds to arrive and enjoy the seeds from your very own pinecone feeder.
